Details:

For over 10 years, Core Dental Berwick has been the trusted dental home for thousands of patients in Melbourne's south-east. As our most established location and the practice with the most comprehensive service list in the Core Dental Group, Berwick is one of the select Core Dental locations offering All-on-4 dental implants.

All-on-4 Pricing at Core Dental Berwick

| Treatment | Indicative Price | |---|---| | All-on-4 single arch (upper or lower) | from \$31,000 | | All-on-4 dual arch (upper and lower) | from \$56,000 |

All costs are provided upfront in writing before any procedure is undertaken. No surprises.

****Payright interest-free payment plans**** available for up to 30 months. Supercare (early superannuation release) available for eligible patients. Some Medicare rebates may apply to the surgical component.

A Complete Smile Transformation

All-on-4 is a full-arch implant solution that replaces an entire set of upper or lower teeth using just four titanium implants. Unlike traditional full dentures, All-on-4 implants are fixed permanently in place - there is nothing to remove, no adhesive required, and no risk of slipping at an inconvenient moment.

The result is a smile that looks natural, functions like real teeth, and preserves the jawbone that dentures allow to deteriorate over time.

Why All-on-4 at Core Dental Berwick?

Berwick is particularly well suited to full-arch implant treatment for several reasons:

- ****The most comprehensive service list**** of any Core Dental location - ****Full mouth rehabilitation**** experience - our team is skilled at complex, multi-stage treatment - ****Extended appointment slots**** - complex implant treatment never feels rushed - ****Over 10 years serving Berwick**** - a team you can trust for a life-changing procedure - ****Specialist paediatric dentist**** on-site for any family members who need care alongside your own treatment - ****Netflix and warm blankets**** - comfort for longer appointments

The All-on-4 Process

Assessment and Planning

Your All-on-4 journey begins with a thorough assessment of your dental and general health, existing bone volume, and treatment goals. We will explain every step, provide a full written treatment plan, and refer you to the Collins Street Specialist Centre (CSSC) for complex cases requiring additional specialist input.

Surgery (Day Surgery Under General Anaesthetic)

All-on-4 surgery is performed under general anaesthetic at a day surgery facility. Four titanium implants are placed in each jaw being treated - angled strategically to maximise contact with available bone without requiring bone grafts in most cases.

Some Medicare rebates may apply to the surgical component.

Immediate Provisional Teeth

You leave the same day with a temporary set of fixed teeth. A soft diet is recommended during the healing period of 3-6 months.

Final Restoration

Once your implants have fully integrated with the bone, your permanent, custom-made bridge is fitted - the final, lasting result of your All-on-4 treatment.

Collins Street Specialist Centre - Our Specialist Partner

For patients requiring complex oral surgery, pre-implant bone grafting, or specialist prosthodontic input, Core Dental Berwick works in close partnership with the Collins Street Specialist Centre (CSSC). This ensures even the most complex full-arch cases receive specialist-level care from AHPRA-registered specialists.

Our Berwick Team

Our Berwick team includes Dr Ivy Jin (Mandarin-speaking), Dr Chelsea Nguyen, and Dr Evan Gai, who has a special interest in oral surgery and dental implants. All clinicians are AHPRA-registered and ADA members. Specialist paediatric dentist Dr Sarah Scott is also available on-site.

Convenient Location at Eden Rise Village

Located at Shop 29, 1 O'Shea Rd in the Eden Rise Village shopping precinct, Core Dental Berwick offers on-site parking and is approximately 15 minutes' walk from Berwick Station.

Payment Options

HICAPS is available for instant health fund claiming. Berwick is a preferred provider for CBHS, HCF and NIB. Payright interest-free payment plans allow you to spread costs over up to 30 months. Supercare (early superannuation release) is available for eligible patients seeking to fund their All-on-4 treatment.

Your Local Dental Practice - over 10 years of comprehensive care in Berwick.

Frequently Asked Questions

****How long does All-on-4 treatment take at Core Dental Berwick?*** The full process from consultation to final restoration typically takes 3 to 6 months, including the day surgery, healing period, and final prosthesis fitting. A temporary arch is placed on the day of surgery so you leave with functional teeth.

****What makes Berwick a good choice for All-on-4?*** Berwick is Core Dental's most established location - over 10 years of community care, the most comprehensive service list in the group, specialist paediatric dentistry, extended appointment slots, and a team you can trust for a major long-term procedure. Our dental prosthetist Alessio Pecorella is on-site for expert prosthetic care.

****Is there anything I should avoid after All-on-4 surgery?*** During the healing period (typically 3 to 6 months), you will be on a soft diet to avoid loading the implants while they integrate. Smoking significantly increases implant failure risk and should be stopped before treatment. Your dentist will provide full post-operative instructions.

****Does All-on-4 require bone grafting?*** Not usually. The All-on-4 technique is specifically designed to utilise available bone without grafting in most cases, placing two implants at an angle to maximise contact with posterior bone. Exceptions are assessed individually via imaging.
