## Details:

Core Dental South Melbourne at 87 Market St, South Melbourne offers assessment and coordination of All-on-4 dental implant treatment for patients in South Melbourne, Port Melbourne, Albert Park, St Kilda, and Melbourne's inner south.

Call (03) 9114 7700 to book a consultation.

### ## What is All-on-4?

All-on-4 is a full-arch implant solution that permanently replaces an entire row of teeth using just four titanium implants. The prosthetic arch attached to these implants looks, feels, and functions like natural teeth - without the inconvenience and limitations of conventional dentures.

For patients who are missing most or all teeth, or who are struggling with ill-fitting dentures, All-on-4 can be genuinely life-changing:

- No more slipping, clicking, or sore spots from loose dentures
- Eat a full, unrestricted diet
- Speak clearly and confidently
- Preserve the jawbone and facial structure
- A permanent smile you can care for like natural teeth

### ## Pricing Guide

All-on-4 treatment at Core Dental includes the full pathway: assessment, prosthetic design, surgical coordination, and follow-up care. As a guide, All-on-4 treatment starts from approximately \$31,000 for a single arch and \$56,000 for a full dual-arch (upper and lower) restoration. A detailed written quote based on your specific clinical requirements is provided before any treatment commences - no hidden fees.

Interest-free payment plans through Payright are available, spreading the cost over up to 30 months.

### ## Our Team at South Melbourne

Lead clinician **\*\*Dr Scott Krause\*\*** (DDS, Loma Linda University, California, 2009) brings an exceptional international background to South Melbourne. Dual-licensed in the USA, Australia, and New Zealand, Dr Krause spent 7 years in private practice in California and has participated in dental missions across Kenya, Bangladesh, Jamaica, and Micronesia. His experience across complex restorative and implant cases is a genuine asset for patients considering All-on-4 treatment.

**\*\*Dr Anchal Verma\*\*** (BDS, Adelaide) is a Clinical Lecturer at the University of Melbourne and is transitioning to lead clinician at South Melbourne. Her academic background ensures treatment is guided by the latest evidence-based practice.

## ## CEREC Technology at South Melbourne

Core Dental South Melbourne is equipped with CEREC same-day crown milling technology. This CAD/CAM system allows us to design, mill, and fit high-precision porcelain restorations in a single visit. For All-on-4 planning and the prosthetic phase of treatment, digital precision scanning and CEREC technology at South Melbourne ensures accuracy and exceptional aesthetic outcomes.

## ## Specialist Referrals - Collins Street Specialist Centre

For the implant placement and surgical component of All-on-4 treatment, Core Dental South Melbourne patients are referred to the Collins Street Specialist Centre within Smile Solutions at 220 Collins Street, Melbourne CBD, where 20+ board-registered dental specialists provide advanced treatment. Your Core Dental dentist coordinates the referral, and your records are shared securely within the group.

This gives South Melbourne and inner-city patients convenient access to world-class All-on-4 surgical expertise in the CBD, with prosthetic care managed close to home at Core Dental.

Collins Street Specialist Centre - Phone: (03) 9650 2726

## ## Frequently Asked Questions

**\*\*How long does All-on-4 treatment take?\*** The full All-on-4 process typically takes 3 to 6 months from initial consultation to final restoration, including the surgical placement phase, healing time, and prosthetic fitting. A same-day temporary arch may be placed on the day of surgery.

**\*\*Is All-on-4 painful?\*** The surgical procedure is performed under general anaesthesia as a day surgery - you will not feel anything during the procedure. Post-operative discomfort is managed with prescribed pain relief and typically resolves within 1 to 2 weeks.

**\*\*How long do All-on-4 implants last?\*** With good oral hygiene and regular professional maintenance, All-on-4 implants can last 20 years or more. The titanium implants fuse permanently with the jawbone, while the prosthetic arch may require replacement or adjustment over time.

**\*\*Am I a suitable candidate?\*** Most adults with significant tooth loss or failing dentition are candidates for All-on-4. Adequate bone density is preferred but not always essential. A full clinical assessment - including imaging - determines your suitability and the best treatment approach.
