Details:

Core Dental Wyndham at 242 Hoppers Ln, Werribee offers assessment and coordination of All-on-4 dental implant treatment for patients in Hoppers Crossing, Werribee, and the broader western suburbs.

Our team includes lead dentist Dr Darren Manoharan - with over 15 years of experience in implant dentistry, crown and bridge, and complex cosmetic cases - and specialist periodontist Dr Nupur Kataria (BDS, DCLinDent Periodontics, FRACDS), the only specialist periodontist in the Core Dental group.

Call (03) 9749 6677 to book your consultation.

What is All-on-4?

All-on-4 is a full-arch implant solution that replaces an entire row of teeth using four strategically placed titanium implants. A fixed prosthetic arch is secured to these four implants, giving you a permanent, non-removable smile that looks and functions like natural teeth.

For patients who have lost most or all of their teeth - or who are currently wearing conventional dentures - All-on-4 offers a transformative improvement in confidence, comfort, and quality of life.

Pricing Guide

All-on-4 treatment at Core Dental covers the complete care pathway from initial assessment through surgical coordination, prosthetic fabrication, and ongoing review. Treatment starts from approximately \$31,000 for a single arch and \$56,000 for a dual-arch (upper and lower) restoration. A detailed written quote is always provided upfront before any work commences.

Interest-free payment plans through Payright are available, spreading the cost over up to 30 months. Preferred health fund provider funds at Wyndham include HCF, CBHS, and NIB.

Why Wyndham for All-on-4?

Core Dental Wyndham has a unique combination of expertise that makes it a strong starting point for All-on-4 enquiries in Melbourne's west.

****Dr Darren Manoharan**** (BDS, Queensland) has a specialist interest in dental implants, crown and bridge restoration, and complex cosmetic dentistry. With 15 years of experience including time as a sole practitioner managing complex cases, Dr Manoharan is well-placed to assess and plan your All-on-4 treatment.

****Dr Nupur Kataria**** (BDS, DCLinDent Periodontics, FRACDS) is the only specialist periodontist in the Core Dental group. Periodontal health is fundamental to long-term implant success, and having a

periodontist on-site at Wyndham ensures your gum and bone health is assessed and optimised before and after implant placement.

Dental prosthetist ****Ahmed Saoud**** (AdvDip Dental Prosthetics) is also on-site at Wyndham, providing specialist prosthetic design and fitting expertise for the restorative phase of treatment.

Specialist Referrals - Collins Street Specialist Centre

For complex All-on-4 cases requiring specialist attention, Core Dental Wyndham patients are referred to the Collins Street Specialist Centre within Smile Solutions at 220 Collins Street, Melbourne CBD, where 20+ board-registered dental specialists provide advanced treatment. Your Core Dental dentist coordinates the referral, and your records are shared securely within the group.

This means you receive initial assessment and treatment planning locally, specialist surgical care at CSSC, and ongoing implant maintenance at Core Dental Wyndham near your home.

Collins Street Specialist Centre - Phone: (03) 9650 2726

Frequently Asked Questions

****How long does All-on-4 treatment take from start to finish?*** The full process typically takes 3 to 6 months, including initial assessment, surgical placement, healing time, and final prosthetic placement. A temporary arch is usually placed on the day of surgery so you leave with functional teeth.

****What makes Wyndham a good choice for All-on-4?*** Wyndham's combination of an implant-experienced lead dentist (Dr Manoharan), a specialist periodontist (Dr Kataria) for bone and gum assessment, and a dental prosthetist (Ahmed Saoud) on-site provides comprehensive planning support. The CSSC referral pathway gives you access to leading oral surgeons for the surgical component.

****Will I need bone grafting before All-on-4?*** Not always. The All-on-4 technique is specifically designed to work with the available bone, often avoiding the need for grafting. A 3D CT scan assessment determines whether any bone augmentation is needed in your case.

****Are the implants permanent?*** The titanium implants fuse with your jawbone and are designed as a long-term solution. With good oral hygiene and regular professional maintenance, they can last many years. The prosthetic arch may need adjustment or replacement over time.
