Details:

Bringing your child to the dentist early and regularly is one of the most important things you can do for their long-term health. At Core Dental Caroline Springs, we believe every child deserves a positive dental experience - one that builds confidence and healthy habits for life.

When Should My Child First Visit the Dentist?

We recommend your child's first dental visit by the age of 12 months, or when their first tooth appears. Early visits help us detect any concerns early, provide guidance on teething and diet, and most importantly, help your child become familiar with the dental environment before any treatment is ever needed.

What We Offer for Children at Core Dental Caroline Springs

- Gentle check-ups and cleans tailored to children's needs - Children's check-ups from \$80 - Digital X-rays (using the lowest possible radiation dose) - Fissure sealants to protect newly erupted permanent molars from decay - Fluoride treatments to strengthen developing teeth - Early assessment for orthodontic concerns - Guidance for parents on diet, fluoride, brushing techniques, and teething - Happy gas (nitrous oxide) available to help anxious children feel calm and comfortable

On-Site Specialist Paediatric Dentist: Dr Angel Babu

Dr Angel Babu holds a DClinDent in Paediatric Dentistry from the University of Otago and previously served as a Senior Dental Registrar at the Royal Children's Hospital Melbourne. Dr Babu has special interests in behaviour management, dental trauma, hypomineralisation (chalky teeth), high caries risk, and children with complex medical needs. At our Caroline Springs practice, Dr Babu can provide treatment under general anaesthesia or oral sedation for children who need extra support - offering a complete pathway from routine care to specialist intervention under one roof. For children with significant dental anxiety, complex needs, or requiring multiple treatments, general anaesthesia is available through our specialist pathway - so no child needs to go without necessary dental care.

Child Dental Benefits Schedule - Bulk Billing

Core Dental Caroline Springs bulk bills eligible children under the Child Dental Benefits Schedule (CDBS). Children aged 2 to 17 from families receiving eligible Australian Government payments may access up to \$1,026 in dental benefits over a two-year period, covering examinations, X-rays, cleaning, fissure sealing, fillings, and extractions.

To check your child's eligibility, visit MyGov (Medicare) or contact our practice - we are happy to help you understand what is covered.

****HICAPS On-Site****

We have HICAPS on-site for instant health fund rebate processing, so you only pay the gap on the day - no waiting for reimbursement.

****Creating Positive Dental Experiences****

We know that a child's early dental experiences shape their relationship with dental care for life. Our Caroline Springs team creates a warm, welcoming environment - from the non-clinical decor to our gentle, patient-centred approach. We explain everything to your child in age-appropriate language and always move at their pace.

For anxious children, we offer happy gas (nitrous oxide) - a safe, mild sedation that helps children relax while remaining fully conscious. It wears off within minutes of the appointment ending.

All clinicians at Core Dental Caroline Springs are AHPRA-registered and members of the Australian Dental Association.

Caroline Springs has a Specialist Paediatric Dentist on-site, so children who need specialist-level care are seen in the same familiar practice as the rest of the family. Our multilingual children's dental team offers consultations in Arabic, Bengali, and Farsi - welcoming Caroline Springs' diverse families with warmth and genuine understanding. Free parking behind the practice at CS Square makes arrival with young children straightforward.
