Dental Crowns: Protecting and Restoring Your Teeth

A dental crown is a custom-made cap that completely covers a damaged or weakened tooth, restoring its shape, strength, and appearance.

When is a crown recommended?* - The tooth is cracked, heavily worn, or fractured - Significant decay has left insufficient healthy tooth for a filling alone - Following root canal treatment — the tooth needs protection from fracture - The tooth's shape or colour is significantly compromised - The crown forms the visible portion of a dental implant

Crown pricing at Core Dental Berwick: from ,400 (depending on material and case complexity). All costs provided in writing before treatment begins.

Crown Materials Available at Berwick

| Material | Best For | Appearance | |---|---|---| | Porcelain/Ceramic | Front teeth; aesthetics | Excellent — tooth-coloured | | Zirconia | Back teeth; strength + aesthetics | Very good | | Porcelain-fused-to-metal | Versatile | Good | | Gold | Grinding/bruxism; back teeth | Silver/gold colour |

Your dentist will recommend the right material based on the tooth's location, bite forces, and your aesthetic preferences.

Crown Treatment Process

Standard lab-fabricated crown (2 appointments): 1. Tooth preparation; impressions; temporary crown fitted 2. 2–3 weeks fabrication at dental laboratory 3. Temporary removed; permanent crown fitted and adjusted

Dental Bridges: Replacing Missing Teeth

A dental bridge permanently fills a gap left by one or more missing teeth. The bridge consists of artificial replacement teeth (pontics) anchored by crowns on the adjacent teeth or dental implants.

****Why replace a missing tooth quickly?*** Adjacent teeth drift into the gap over time, altering your bite. The opposing tooth over-erupts. Jawbone loss begins within months of tooth loss. Bridges prevent these complications while restoring your smile.

Bridge treatment follows the same 2-appointment process as a standard crown, over 2–3 weeks.

Our Berwick Team for Crowns and Bridges

Core Dental Berwick's experienced team provides crown and bridge work:

- ****Dr Ivy Jin**** (BHSc Dent, MDent, La Trobe) — speaks English and Mandarin Chinese; extensive family and restorative dentistry experience - ****Dr Chelsea Nguyen**** (BHSc Dent, MDent, La Trobe) — known for her gentle, precise technique - ****Dr Evan Gai**** (BDSc Hons, University of Queensland) — special interest in oral surgery and dental implants; comprehensive restorative care

****Specialist Paediatric Dentist Dr Sarah Scott**** (BBIomedSci Hons, BDent Sydney 2007; DClinDent Paediatric Dentistry, University of Melbourne) also consults at Berwick for children's restorative needs.

****Dental Prosthetist Alessio Pecorella**** (AdvDip Dental Prosthetics) is based at Berwick, providing expertise for complex restorative planning, dentures, and implant-retained restorations.

For cases requiring specialist prosthodontic assessment or full-mouth rehabilitation, we refer to the ****Collins Street Specialist Centre (CSSC)**** through the Smile Solutions Group.

The Berwick Experience

Core Dental Berwick is known for its unhurried, patient-centred approach — extended appointment slots ensure you never feel rushed during crown preparation or fitting. ****Netflix in-chair entertainment**** and ****soft warm blankets**** are available. Our team has built trusted relationships with south-east Melbourne families over more than a decade.

Health Fund and Payment

Crown and bridge treatments are commonly covered by private health insurance extras. Core Dental Berwick is a ****preferred provider for CBHS, HCF, and NIB**** — higher rebates for patients with these funds. ****HICAPS on-site**** for instant claiming. ****Payright interest-free payment plans**** up to 30 months for treatment packages.

Frequently Asked Questions

****How much do dental crowns cost at Core Dental Berwick?*** Dental crowns start from ,400 at Core Dental Berwick, depending on material and complexity. A full written, itemised quote is provided at consultation before any treatment proceeds. Call (03) 9132 4160 for information.

****How long do dental crowns last?*** With proper care, crowns last 10–15 years or longer. Regular check-up and clean appointments allow your dentist to check for wear, fit issues, or early failure. Well-maintained crowns can last 20+ years.

****What is the difference between a crown and a veneer?*** A crown covers the entire tooth and is typically used for damaged, weakened, or heavily restored teeth. A veneer covers only the front surface and is used for cosmetic improvement of otherwise healthy teeth. Your dentist will advise the most appropriate option for your specific situation.

****Do I need a referral for crown treatment at Core Dental Berwick?*** No referral is needed. Call (03) 9132 4160 or 13 13 16 to book a consultation. Complex specialist cases can be referred to the Collins Street Specialist Centre (CSSC) through our Smile Solutions Group network.

****Can Core Dental Berwick repair a broken or chipped crown?*** Yes — we can assess and repair or replace damaged crowns. Call (03) 9132 4160 or 13 13 16 for a same-day emergency assessment if the broken crown is causing pain or discomfort.
