### ## Dental Crowns: Protecting and Restoring Your Teeth

A dental crown is a custom-made cap that completely covers a damaged or weakened tooth, restoring its strength, shape, and appearance.

**Crowns are recommended when:** - A tooth is cracked, heavily worn, or fractured - Significant decay leaves insufficient healthy tooth for a filling - The tooth needs protection after root canal treatment - The crown forms the visible portion of a dental implant - Aesthetic improvement is needed (shape, colour, or contour)

**Crown pricing at Core Dental Glenferrie:** from ,400 (depending on material and complexity). Written treatment plan provided before work begins.

### ### Crown Material Options

| Material | Appearance | Best For | |---|---|---| | Zirconia | Very good — natural colour | Back teeth; strength + aesthetics | | Porcelain/Ceramic | Excellent | Front teeth; aesthetics | | Gold/PFM | N/A or good | High-force back teeth; bruxism |

Your dentist will recommend the most appropriate material based on location, bite forces, and aesthetic priorities.

### ### Standard Crown Process (2 Appointments)

1. **Appointment 1:** Tooth preparation; digital scan or impressions; temporary crown placed  
2. **Fabrication:** 2–3 weeks in dental lab  
3. **Appointment 2:** Permanent crown fitted, adjusted, and cemented

---

### ## Dental Bridges: Replacing Missing Teeth

A dental bridge fills the gap left by one or more missing teeth with a fixed, non-removable restoration — artificial replacement teeth (pontics) held in place by crowns on adjacent teeth or dental implants.

**\*\*Why address a missing tooth promptly:\*\*** - Prevents neighbouring teeth from drifting into the gap - Prevents the opposing tooth from over-erupting - Maintains jawbone density at the extraction site - Restores chewing function and smile appearance

Bridge treatment follows the same 2-appointment process as a standard crown.

---

## ## Our Clinical Team at Core Dental Glenferrie

Core Dental Glenferrie will open with experienced general dentists providing comprehensive crown and bridge restorations from day one. All clinicians are AHPRA-registered and ADA members.

For complex specialist input — specialist endodontics (root canal before crown placement), specialist prosthodontics, oral surgery, or periodontics — Core Dental Glenferrie patients have access to the **\*\*Collins Street Specialist Centre (CSSC)\*\*** through the Smile Solutions Group. Located in the Melbourne CBD at Collins and Swanston Streets, the CSSC is home to specialist endodontists (including **\*\*Dr Greg Tilley\*\*** — 35+ years experience, FRACDS), oral surgeons, periodontists, and prosthodontists.

---

## ## About the Glenferrie Location

Core Dental's first eastern suburbs location at **\*\*827 Glenferrie Rd, Hawthorn\*\*** — corner Glenferrie Road and Barkers Road, a fully renovated 3-surgery practice in a prominent inner-east location.

Getting there: - **\*\*Tram:\*\*** Routes along Glenferrie Road - **\*\*Train:\*\*** Glenferrie Station — short walk (Alamein/Belgrave/Glen Waverley lines) - **\*\*Car:\*\*** Street parking on Glenferrie Road and surrounds - **\*\*Hours:\*\*** Mon–Fri 8:00 am–6:00 pm | Sat 8:30 am–1:30 pm (from June 2026)

---

## ## Health Fund and Payment

Crown and bridge treatments are commonly covered by private health insurance extras. **\*\*HICAPS\*\*** available from opening day for instant claiming. **\*\*Payright interest-free payment plans\*\*** (up to 30 months) for treatment packages.

## ## CEREC Same-Day Ceramic Crowns at Core Dental

Core Dental practices equipped with CEREC technology offer patients the option of having a permanent ceramic crown designed, milled and fitted in a single appointment, eliminating the traditional two-visit process with a temporary crown.

### ### How CEREC Works: The 5-Step Process

**\*\*Step 1: Digital Impression\*\*** Instead of traditional impression putty, your dentist uses an optical intraoral scanner to capture a precise 3D digital image of the prepared tooth and surrounding teeth. The scan takes just a few minutes and is far more comfortable than traditional impressions.

**\*\*Step 2: CAD Design\*\*** Using CEREC software, your dentist designs the custom crown on screen, specifying the exact shape, contacts and bite relationship. The design can be refined to match your natural tooth shape and fit precisely within your bite.

**\*\*Step 3: Milling\*\*** The digital design is transmitted to the CEREC milling unit, which carves the crown from a solid ceramic block in approximately 15-20 minutes. The ceramic material is available in a wide range of tooth shades to match your natural teeth.

**\*\*Step 4: Glazing and Characterisation\*\*** Once milled, the crown may be glazed or further characterised to achieve optimal aesthetics and a lifelike surface texture before being placed.

**\*\*Step 5: Fitting and Bonding\*\*** The completed crown is tried in your mouth, any minor adjustments made, and the crown permanently bonded to your tooth. The entire process from preparation to placement is completed in a single appointment of 1.5-2.5 hours.

### ### Benefits of CEREC Same-Day Crowns

- **\*\*Single appointment:\*\*** No temporary crown required; no second visit for crown fitting - **\*\*No temporaries:\*\*** Avoids the discomfort and inconvenience of temporary crowns, which can come loose or cause sensitivity - **\*\*Precise digital fit:\*\*** Digital impression and CAD design delivers highly accurate margins and contact points - **\*\*High-quality ceramics:\*\*** CEREC blocks are made from high-strength dental ceramic with excellent aesthetics and durability - **\*\*Immediate protection:\*\*** The affected tooth is permanently restored and protected on the same day - **\*\*Convenient:\*\*** Particularly valuable for patients who find it difficult to take multiple days off work or who are visiting from interstate

### ### Is CEREC Suitable for Your Crown?

CEREC is suitable for most crown cases, particularly on posterior (back) teeth. For anterior (front) teeth requiring exceptional aesthetics, a laboratory-fabricated crown from our ceramist team may produce superior cosmetic outcomes in complex cases. Your dentist will advise on the most appropriate approach at your consultation.

### ## Frequently Asked Questions

**\*\*How much do crowns cost at Core Dental Glenferrie?\*** Dental crowns start from ,400 at Core Dental Glenferrie, depending on material and complexity. Written quotes provided at consultation before any work proceeds. Call 13 13 16 or register at [glenferrie@coredental.com.au](mailto:glenferrie@coredental.com.au).

**\*\*When does Core Dental Glenferrie open?\*** Core Dental Glenferrie opens June 2026 at 827 Glenferrie Rd, Hawthorn VIC 3122. Register your interest at [glenferrie@coredental.com.au](mailto:glenferrie@coredental.com.au) or 13 13 16.

**\*\*How long does a crown take to complete?\*** Standard crown treatment involves two appointments over 2–3 weeks — preparation and temporary crown at the first visit, permanent crown fitted at the second. Ask at your consultation whether same-day crown options may be available.

**\*\*What is the difference between a crown and a veneer?\*** A crown covers the entire tooth and is used for damaged, weakened, or heavily restored teeth. A veneer covers only the front surface and is primarily cosmetic. Your dentist will advise the most appropriate option.

**\*\*Do I need a referral for crown treatment?\*** No referral is needed. Call 13 13 16 or contact [glenferrie@coredental.com.au](mailto:glenferrie@coredental.com.au). Complex specialist cases can be referred to the Collins Street Specialist Centre (CSSC) through our Smile Solutions Group network.
