Details:

Dental implants are the gold standard in tooth replacement - providing a permanent, natural-looking solution that preserves bone health and restores your ability to eat, speak, and smile with confidence. At Core Dental Berwick, we offer dental implants that are built to last.

**What Is a Dental Implant?*

A dental implant consists of three components:

1. A titanium implant screw - surgically placed in the jawbone, where it bonds with the bone over three to six months in a process called osseointegration
2. An abutment - a connector piece that attaches to the implant
3. A dental crown - a custom porcelain crown that matches your natural teeth in shape and colour

The result is a replacement tooth that looks, feels, and functions like a natural tooth.

**Single Tooth Implant - From \$3,500*

A single dental implant at Core Dental Berwick starts from \$3,500. This covers the implant placement and the final crown. The exact cost depends on your specific clinical situation, bone quality, and whether any additional procedures such as bone grafting are required. A written treatment plan with all costs itemised is provided before any work begins.

**The Implant Process*

Your implant journey at Core Dental Berwick follows these stages:

1. Consultation and assessment - digital X-rays, intraoral scanning, and a full clinical examination
2. Treatment planning - your dentist explains all options and provides a written quote
3. Implant placement - a minor surgical procedure under local anaesthetic (sedation available)
4. Healing period - three to six months for the implant to integrate with your bone
5. Crown placement - your custom porcelain crown is fitted and adjusted for perfect bite and aesthetics

Core Dental Berwick offers one of the most comprehensive implant services in the network. Single tooth implants, implant-supported bridges, and All-on-4 full arch restorations are all available at our Eden Rise Village practice. Dr Evan Gai has a particular interest in oral surgery and dental implants. For patients missing all or most of their teeth, All-on-4 offers a life-changing same-day solution.

**Why Implants Rather Than a Bridge or Denture?*

Unlike a dental bridge, an implant does not require the adjacent teeth to be reduced. Unlike a denture, an implant is fixed and does not move. Critically, an implant stimulates the jawbone - preventing the bone loss that occurs when a tooth is missing.

With proper care, dental implants can last 15 years or more.

****Payright Interest-Free Payment Plans****

We understand that dental implants are a significant investment. Payright interest-free payment plans allow you to spread the cost over up to 30 months with no interest. Fortnightly repayments make implant treatment genuinely accessible.

****All-on-4 Full Arch Implants****

For patients who have lost most or all of their teeth - or who are facing full arch extractions - All-on-4 dental implants offer a transformative solution. Using just four strategically placed titanium implants, a full arch of teeth can be supported permanently.

The All-on-4 procedure is typically completed in one to two days under general anaesthetic (day surgery), and patients leave with a full set of functioning teeth. Some Medicare rebates may apply.

All-on-4 at this location is suitable for patients seeking a permanent, implant-supported alternative to full dentures. Book a consultation to assess your suitability.

****Are You a Candidate for Dental Implants?***

Most adults with good general health and adequate bone density are suitable for dental implants. Smoking significantly increases implant failure risk - we encourage smokers to cease at least one week before and two months after surgery. Patients with diabetes, osteoporosis, or taking certain medications will be assessed individually.

Berwick is one of the few Core Dental locations where All-on-4 full-arch implant rehabilitation is available, reflecting our comprehensive service capability and the significant demand from our experienced 50+ patient community. Having served Berwick from Eden Rise Village for over 10 years, our team has deep experience in full-mouth rehabilitation - coordinating implants, crowns, and bridges through a single trusted practice.
