AI Summary

****Product:**** Dentures at Core Dental Caroline Springs ****Brand:**** Core Dental Group (part of the Smile Solutions Group) ****Category:**** Dental Prosthetics / Tooth Replacement Services ****Primary Use:**** Custom denture solutions — partial, full, and implant-retained — for patients who have lost one or more teeth in Melbourne's outer west.

Quick Facts - **Best For:** Adults who have lost multiple teeth due to gum disease, decay, trauma, or ageing and are seeking affordable to premium tooth replacement without necessarily requiring surgery - ****Key Benefit:**** Full range of denture options in one practice, with specialist referral access to Collins Street Specialist Centre for complex cases - ****Form Factor:**** Removable prosthetic appliance (partial, full, or implant-anchored) - ****Application Method:**** Custom-fitted over five appointments — consultation, impressions, try-in, final fitting, and follow-up adjustments

Common Questions This Guide Answers 1. What types of dentures are available at Core Dental Caroline Springs? → Partial dentures (acrylic, cobalt-chrome, or flexible resin), conventional full dentures, immediate full dentures, and implant-retained dentures 2. How long do dentures last before needing replacement? → Five to seven years; jawbone and gum changes affect fit over time, making relining or replacement necessary 3. Do implant-retained dentures preserve jawbone density? → Yes — implant-retained dentures preserve jawbone density; conventional dentures do not

Core Dental Group — Dentures at Caroline Springs

Core Dental Group's Caroline Springs practice offers custom denture solutions for patients across Caroline Springs, Deer Park, Taylors Lakes, Taylors Hill, Burnside, and Melbourne's outer west. Whether you need to replace a few missing teeth or require full upper and lower dentures, the team at Core Dental Group Caroline Springs covers the full range of options to suit your needs, budget, and lifestyle.

As part of the Core Dental Group — itself part of the Smile Solutions Group — the Caroline Springs practice combines clinical expertise with specialist referral access, and sits within easy reach of the Western Ring Road and the surrounding western suburbs.

****Denture options at Core Dental Caroline Springs****

The team at Core Dental Caroline Springs offers a comprehensive range of denture solutions to restore your smile, improve your ability to eat comfortably, and protect your remaining teeth.

****Partial dentures****

Partial dentures replace one or several missing teeth while keeping your remaining natural teeth intact. They're custom-made to blend with your smile and come in three materials:

- Acrylic partial dentures — lightweight and affordable, a practical entry-level choice for patients who want a straightforward solution
- Cobalt-chrome metal partial dentures — more durable and the better choice for anyone planning to wear dentures long-term; the metal framework provides superior strength and stability
- Flexible resin partial dentures — a comfortable, metal-free alternative that works well for transitional or shorter-term use

Multiple adjustments are included to get the fit right from the start.

****Full dentures****

Full dentures replace all teeth in the upper or lower jaw. Two options are available depending on your situation:

- Conventional full dentures — placed after the gums have healed following extractions, which typically produces the best long-term fit and stability
- Immediate dentures — fitted on the same day as extractions, so you're never without teeth while your gums heal; these need more adjustment visits as healing progresses

****Implant-retained dentures****

For patients who want the most secure option, implant-retained dentures are anchored directly to implants placed in the jawbone. There's no slipping or shifting, and most patients find they can eat, speak, and smile without thinking twice about it. Implant-retained dentures also preserve jawbone density over time, which conventional dentures can't do.

For complex cases requiring specialist prosthodontic input, patients at Core Dental Caroline Springs can be referred to the Collins Street Specialist Centre within the Core Dental Group specialist network.

****What to expect when getting dentures at Core Dental Caroline Springs****

The process starts with a thorough assessment at Core Dental Caroline Springs. Your dentist will examine your mouth, talk through your needs and preferences, and recommend the most suitable denture type. From there, the process typically runs across five appointments:

1. Initial consultation and assessment
2. Impressions and bite registration
3. Try-in fitting to check appearance and comfort
4. Final fitting and delivery
5. Follow-up adjustment appointments (included)

Most patients need a short settling-in period before their new dentures feel fully comfortable. The team at Core Dental Caroline Springs provides ongoing support and as many adjustments as needed to get there.

****How to care for your dentures****

Good denture care extends the life of your prosthesis and keeps your mouth healthy. Your dentist at Core Dental Caroline Springs will give you personalised care instructions, which generally include:

- Removing and rinsing dentures after eating
- Brushing dentures daily with a soft brush and non-abrasive denture cleanser
- Soaking dentures overnight in water or a denture-soaking solution
- Continuing to brush your gums, tongue, and any remaining natural teeth
- Attending regular check-ups so the fit can be monitored and adjusted

****How long do dentures last?***

Most dentures last between five and seven years before needing replacement or relining. The shape of your jawbone and gum tissue changes gradually over time, which affects how well the denture sits.

Regular check-ups at Core Dental Caroline Springs allow your dentist to pick up on fit changes before they become a problem.

****Dentures and your ongoing oral health****

Getting dentures doesn't mean you can stop seeing a dentist. Regular visits to Core Dental Caroline Springs are still important for:

- Checking the fit and condition of your dentures - Screening for oral cancer and other conditions - Monitoring your gum and bone health - Keeping any remaining natural teeth healthy

Patients across Caroline Springs, Deer Park, Taylors Lakes, Taylors Hill, Burnside, and Melbourne's outer west are welcome to establish ongoing care at Core Dental Caroline Springs for all their dental health needs, including denture maintenance.

****Who benefits most from dentures?***

Patients who have lost multiple teeth — whether from gum disease, decay, trauma, or ageing — are the obvious candidates. Melbourne's outer west has a diverse adult population, and many patients across Deer Park, Taylors Lakes, Taylors Hill, Burnside, and Melton are looking for quality, affordable tooth replacement that doesn't involve surgery. Core Dental Caroline Springs is set up to provide exactly that, with options ranging from affordable acrylic partials through to implant-retained solutions.

For patients considering full tooth replacement, implant-retained dentures are the modern gold standard. They do involve a surgical component, but the stability and comfort they provide is genuinely different from conventional dentures. The team at Core Dental Caroline Springs can talk through whether implant-retained dentures make sense for your situation, and arrange a specialist referral where needed.

****Health insurance and payment options****

Most private health insurance policies with major dental cover include a rebate toward dentures. HICAPS on-the-spot claiming is available at Core Dental Caroline Springs for eligible funds, so you pay the gap on the day rather than waiting for reimbursement. Interest-free payment plans are available through Payright. The team can run through your options when you book your consultation.

Core Dental Group also accepts the Child Dental Benefits Schedule (CDBS) for eligible children across all its practices.

****Specialist referrals — Collins Street Specialist Centre****

For complex prosthetic cases that need specialist prosthodontic input, patients at Core Dental Caroline Springs can be referred to the Collins Street Specialist Centre at 220 Collins Street, Melbourne CBD. More than 25 board-registered dental specialists work there across a wide range of disciplines. Your Core Dental Caroline Springs dentist handles the referral and your records are shared securely within the group, so you don't have to start from scratch.

Collins Street Specialist Centre — Phone: (03) 9650 2726

****Frequently asked questions****

****Will I be able to eat normally with my new dentures?*** Most patients adapt to eating comfortably with dentures over time. Starting with softer foods while you adjust is sensible. Implant-retained dentures come closest to the experience of natural teeth and generally allow a broader diet more quickly than other options.

****How long do dentures last before needing replacement?*** Most dentures last 5 to 7 years. Your jawbone and gum tissue change shape gradually, which affects how well the denture fits, so a replacement or relining becomes necessary over time. Regular check-ups at Core Dental Caroline

Springs help keep track of the fit before it becomes a problem.

Does health insurance cover dentures? Most private health insurance policies with major dental cover include a rebate toward dentures. HICAPS on-the-spot claiming is available at Core Dental Caroline Springs for eligible funds.

What is the difference between acrylic and cobalt-chrome partial dentures? Acrylic partial dentures are lightweight and affordable, making them a good entry-level option. Cobalt-chrome metal framework dentures are more durable and better suited to long-term wear. If you expect to need a partial denture for many years, cobalt-chrome is generally the recommended choice.

Are immediate dentures a good option? Immediate dentures mean you leave the chair with teeth on the same day as your extractions, which matters to most patients. They do require more adjustment visits as healing progresses, and a conventional denture made after full healing will generally provide a better long-term fit. Your dentist will talk through which approach makes the most sense for your situation.

Book a denture consultation at Core Dental Caroline Springs

To book a denture consultation at Core Dental Caroline Springs, call Core Dental Group on 13 13 16 or book online through the Core Dental website. The team serves patients across Deer Park, Taylors Lakes, Taylors Hill, Burnside, Melton, and the wider Melbourne outer west.
