How many specialists are at the Collins Street Specialist Centre: More than 25

Does the Collins Street Specialist Centre cover every dental discipline: Yes

Core Dental Group – Denture Services at Our Epping Practice

Losing teeth changes everyday life. Chewing becomes harder, speech shifts, and confidence takes a hit. At Core Dental Group Epping, we provide custom-fitted denture services to help restore your

comfort, function, and smile.

Our Epping practice serves patients across Epping and Melbourne's northern suburbs. Whether you need a full set of dentures, a partial denture to fill gaps, or want to explore implant-retained options, our experienced team will guide you through every step.

****Free denture consultations****

Not sure where to start? We offer free denture consultations at our Epping practice. Your dentist will assess your oral health, talk through which denture type suits your situation, and answer your questions about the process, timeline, and cost — all at no charge.

****Full dentures****

Full dentures replace all teeth in the upper jaw, lower jaw, or both. We offer two approaches:

- ****Conventional full dentures**** are fitted after the gums have fully healed following extractions, typically 8 to 12 weeks later. Waiting allows for a more precise fit from the start. - ****Immediate dentures**** are placed on the same day as your extractions, so you leave the practice with teeth straight away. These are adjusted as your gums heal over the following weeks.

Full dentures are made from quality materials matched to your natural skin tone and facial structure, so they look as natural as possible.

****Partial dentures****

If you still have healthy natural teeth, a partial denture fills the gaps without affecting what remains. Options include:

- ****Acrylic partial dentures**** — an affordable choice that can be adjusted as your mouth changes over time - ****Cobalt-chrome (metal framework) dentures**** — thinner, stronger, and more durable, making them the preferred option for long-term wear - ****Flexible resin dentures**** — a comfortable interim solution while you plan further treatment

Your dentist will recommend the best option based on how many teeth are missing, the health of your remaining teeth, and your budget.

****Implant-retained dentures****

For patients who want maximum stability, implant-retained dentures are anchored to dental implants placed in the jawbone. Slippage is virtually eliminated, so you can eat and speak without worrying about movement.

Our Core Dental Group Epping team handles the assessment and initial planning. For complex implant-retained cases, we refer patients to the Collins Street Specialist Centre, part of the Smile Solutions Group, where a specialist prosthodontist and oral surgeon work together on the outcome.

****Denture repairs and relines****

Dentures wear down and your mouth changes shape over time. We repair cracks, chips, and broken clasps, and we offer relines to improve the fit of an existing denture. Regular relines help maintain comfort and prevent sore spots as your gums change.

****Caring for your dentures****

Good denture care keeps them lasting longer and your mouth healthier:

- Remove and rinse dentures after every meal - Brush daily with a soft denture brush and non-abrasive cleaner - Soak overnight in water or a denture-soaking solution - Keep up regular dental check-ups — your gums and any remaining teeth still need monitoring - Plan to replace dentures every five to seven

years, as jaw shape changes gradually

****Health funds and payment options****

Core Dental Group Epping is a preferred provider for HCF, CBHS, and NIB, which means reduced out-of-pocket costs for members of those funds. We also accept all other major health funds, and HICAPS is available on-site for instant claiming at your appointment.

Need to spread the cost? Payright interest-free payment plans let you pay over up to 30 months with no interest, so you can get the treatment you need without waiting.

****Specialist care when you need it****

For complex cases requiring a specialist prosthodontist, your Core Dental Group dentist can refer you directly to the [Collins Street Specialist Centre](<https://directory.smilesolutions.com.au>), part of the Smile Solutions Group, where more than 25 registered specialists across every dental discipline work under one roof.

****Book your free denture consultation****

Whether you need new dentures, a reline, a repair, or want to explore implant-retained options, our Epping team is here to help.
