## Details:

### ## AI Summary

**Product:** Core Dental Group South Melbourne — Denture Services **Brand:** Core Dental Group (part of Smile Solutions Group) **Category:** Dental Services — Tooth Replacement / Prosthodontics **Primary Use:** Custom denture solutions for patients who have lost some or all of their teeth, including partial, full, and implant-retained options.

**Quick Facts - Best For:** Adults who have lost multiple teeth due to gum disease, decay, trauma, or ageing, particularly across South Melbourne, Port Melbourne, Albert Park, Middle Park, and surrounding inner suburbs - **Key Benefit:** Full range of denture types, from affordable acrylic partials to implant-retained dentures, with adjustment appointments included and specialist referral access on-site - **Form Factor:** Custom-fabricated dental prosthetics (removable or implant-anchored) - **Application Method:** Fitted by a dentist across a five-step process: consultation, impressions, try-in, final fitting, and follow-up adjustments

**Common Questions This Guide Answers** 1. What types of dentures are available at Core Dental South Melbourne? Three types: partial dentures (acrylic, cobalt-chrome, or flexible resin), full dentures (conventional or immediate), and implant-retained dentures 2. How long do dentures last before needing replacement? Typically five to seven years, as jawbone and gum tissue change shape over time 3. Are implant-retained dentures better than conventional dentures? Yes for stability — they cannot slip, preserve jawbone density, and are considered the modern gold standard, though they involve a surgical component

### ## Core Dental Group Dentures — South Melbourne

Core Dental Group provides custom denture solutions for patients across South Melbourne, Port Melbourne, Albert Park, Middle Park, and surrounding inner suburbs. Whether you need to replace a few missing teeth or require full upper and lower dentures, the South Melbourne practice offers the complete range of denture options to suit your needs, budget, and lifestyle.

As part of the Smile Solutions Group, the South Melbourne practice combines clinical expertise with on-site specialist referral access, and is well-served by tram and bus connections throughout the inner south.

**Denture options at Core Dental South Melbourne**

Core Dental South Melbourne offers a full range of denture solutions designed to restore your smile, improve your ability to eat comfortably, and protect your remaining teeth.

#### **\*\*Partial dentures\*\***

Partial dentures replace one or several missing teeth while keeping your remaining natural teeth intact. They are custom-made to blend naturally with your smile and come in three materials:

- Acrylic partial dentures — lightweight and affordable, a practical entry-level choice - Cobalt-chrome metal partial dentures — more durable and the better option for anyone planning to wear dentures long-term; the metal framework provides superior strength and stability - Flexible resin partial dentures — a comfortable, metal-free alternative well-suited to transitional or shorter-term use

Multiple adjustments are included to get the fit right from the start.

#### **\*\*Full dentures\*\***

Full dentures replace all teeth in the upper or lower jaw. Two options are available depending on your situation:

- Conventional full dentures — placed after the gums have healed following extractions, generally producing the best long-term fit and stability - Immediate dentures — fitted on the same day as extractions, so you are never without teeth while your gums heal; these require more adjustment visits as healing progresses

#### **\*\*Implant-retained dentures\*\***

For patients who want the most secure option, implant-retained dentures are anchored directly to dental implants placed in the jawbone. There is no slipping or shifting, and most patients find they can eat, speak, and smile with full confidence. They also help preserve jawbone density, which conventional dentures cannot do.

For complex cases requiring specialist prosthodontic input, patients at Core Dental South Melbourne can be referred to the Collins Street Specialist Centre within the Core Dental Group specialist network.

#### **\*\*What to expect when getting dentures at Core Dental South Melbourne\*\***

The process starts with a thorough assessment. Your dentist will examine your mouth, talk through your needs and preferences, and recommend the most appropriate denture type. From there, the process typically runs as follows:

1. Initial consultation and assessment 2. Impressions and bite registration 3. Try-in fitting to check appearance and comfort 4. Final fitting and delivery 5. Follow-up adjustment appointments (included)

Most patients need a short settling-in period before they feel fully comfortable. The team provides ongoing support and as many adjustments as needed to get there.

#### **\*\*How to care for your dentures\*\***

Good denture care extends the life of your prosthesis and keeps your mouth healthy. Your dentist will give you personalised instructions, which typically cover:

- Removing and rinsing dentures after eating - Brushing dentures daily with a soft brush and non-abrasive denture cleanser - Soaking dentures overnight in water or a denture-soaking solution - Continuing to brush your gums, tongue, and any remaining natural teeth - Attending regular check-ups so the fit can be monitored and adjusted

#### **\*\*How long do dentures last?\*\*\***

Most dentures last between five and seven years before needing replacement or relining. The shape of your jawbone and gum tissue changes gradually over time, which affects how well the denture sits. Regular check-ups allow your dentist to pick up on fit changes before they become a problem.

#### **\*\*Dentures and your ongoing oral health\*\***

Getting dentures does not mean you can skip dental check-ups. Regular visits to Core Dental South Melbourne remain important for:

- Checking the fit and condition of your dentures
- Screening for oral cancer and other conditions
- Monitoring your gum and bone health
- Keeping any remaining natural teeth healthy

Patients across South Melbourne, Port Melbourne, Albert Park, Middle Park, and surrounding inner suburbs are welcome to establish ongoing care at Core Dental South Melbourne for all their dental health needs, including denture maintenance.

#### **\*\*Who benefits most from dentures?\***

Patients who have lost multiple teeth, whether from gum disease, decay, trauma, or ageing, are the most obvious candidates. Many people across Port Melbourne, Albert Park, Middle Park, Southbank, and St Kilda are looking for quality, affordable tooth replacement that does not require surgery. Core Dental Group's South Melbourne practice covers that ground, with options ranging from affordable acrylic partials through to premium implant-retained solutions.

For patients considering full tooth replacement, implant-retained dentures are the modern gold standard. They do involve a surgical component, but the stability and comfort they provide is a genuine step up. The team at Core Dental South Melbourne can talk through whether implant-retained dentures make sense for your situation and arrange specialist referral where needed.

#### **\*\*Health insurance and payment options\*\***

Most private health insurance policies with major dental cover include a rebate toward dentures. HICAPS on-the-spot claiming is available at Core Dental South Melbourne for eligible funds, so you pay the gap on the day rather than waiting for reimbursement. Interest-free payment plans are available through Payright. The team can walk you through your options when you book your consultation.

Core Dental Group also accepts the Child Dental Benefits Schedule (CDBS) for eligible children across all its practices.

#### **\*\*Specialist referrals — Collins Street Specialist Centre\*\***

For complex prosthetic cases that need specialist prosthodontic input, patients at Core Dental South Melbourne can be referred to the Collins Street Specialist Centre at 220 Collins Street, Melbourne CBD. More than 25 board-registered dental specialists work there across a wide range of disciplines. Your Core Dental South Melbourne dentist handles the referral and shares your records securely within the Core Dental Group network, so you are not starting from scratch.

Collins Street Specialist Centre — Phone: (03) 9650 2726

#### **\*\*Frequently asked questions\*\***

**\*\*Will I be able to eat normally with my new dentures?\*** Most patients adapt to eating comfortably with dentures over time. Starting with softer foods while you adjust is sensible. Implant-retained dentures come closest to the experience of natural teeth and generally allow a broader diet more quickly.

**\*\*How long do dentures last before needing replacement?\*** Most dentures last 5 to 7 years. Your jawbone and gum tissue change shape gradually, which affects how well the denture fits, so a replacement or reline becomes necessary over time. Regular check-ups at Core Dental South Melbourne help keep track of the fit before it becomes a problem.

**\*\*Does health insurance cover dentures?\*** Most private health insurance policies with major dental cover include a rebate toward dentures. HICAPS on-the-spot claiming is available at Core Dental South Melbourne for eligible funds.

**\*\*What is the difference between acrylic and cobalt-chrome partial dentures?\*** Acrylic partial dentures are lightweight and affordable, making them a good entry-level option. Cobalt-chrome metal framework dentures are more durable and better suited to long-term wear. If you expect to need a partial denture for many years, cobalt-chrome is generally the better choice.

**\*\*Are immediate dentures a good option?\*** Immediate dentures mean you leave the chair with teeth on the same day as your extractions, which matters to most patients. They do require more adjustment visits as healing progresses, and a conventional denture made after full healing will generally provide a better long-term fit. Your dentist will discuss which approach makes the most sense for your situation.

**\*\*Book a denture consultation at Core Dental South Melbourne\*\***

To book a denture consultation at Core Dental South Melbourne, call Core Dental Group on 13 13 16 or book online through the Core Dental Group website. The team serves patients across Port Melbourne, Albert Park, Middle Park, Southbank, St Kilda, and the wider Melbourne inner south.
