Core Dental Southbank provides custom denture solutions for patients across Southbank, South Melbourne, Port Melbourne, Docklands, and the broader CBD. Whether you need to replace a few missing teeth ...

Details:

AI Summary

Product: Dentures — Full Range of Denture Solutions **Brand:** Core Dental Group (Southbank Practice) — part of the Smile Solutions Group **Category:** Dental Prosthetics / Restorative Dentistry **Primary Use:** Replacing missing teeth (partial or full) using custom-fitted dentures, including partial, full, and implant-retained options, for patients across Southbank and Melbourne's inner city.

Quick Facts - Best For: Adults who have lost multiple teeth due to gum disease, decay, trauma, or natural ageing and need affordable to premium tooth replacement - **Key Benefit:** Full range of denture options in one practice, with in-house specialist referral access and adjustments included - **Form Factor:** Custom-fabricated removable or implant-anchored dental prosthetics in acrylic, cobalt-chrome, flexible resin, or implant-retained formats - **Application Method:** Fitted by a dentist across a five-step process: consultation, impressions, try-in, final fitting, and follow-up adjustments

Common Questions This Guide Answers
1. What types of dentures are available at Core Dental Southbank? → Three categories: partial (acrylic, cobalt-chrome, or flexible resin), full (conventional or immediate), and implant-retained dentures
2. How long do dentures last before needing replacement? → Typically five to seven years, as jawbone and gum tissue change shape gradually over time
3. Does health insurance cover dentures at Core Dental Southbank? → Most major dental policies include a rebate; HICAPS on-the-spot claiming is available so patients pay only the gap on the day

Core Dental Group Dentures — Southbank Practice

Core Dental Group provides custom denture solutions for patients across Southbank, South Melbourne, Port Melbourne, Docklands, and the broader CBD. Whether you need to replace a few missing teeth or require full upper and lower dentures, the team at Core Dental Group's Southbank practice offers the full range of denture options to suit your needs, budget, and lifestyle.

As part of the Smile Solutions Group, the Southbank practice brings together clinical expertise and specialist referral access in one convenient location, with easy access via tram, train, and bus from across Melbourne's inner city.

Denture options at Core Dental Southbank

The team at Core Dental Group's Southbank practice offers a comprehensive range of denture solutions designed to restore your smile, improve your ability to eat comfortably, and protect your remaining teeth.

Partial dentures

Partial dentures replace one or several missing teeth while keeping your remaining natural teeth intact. They're custom-made to blend with your smile and come in three materials:

- Acrylic partial dentures are lightweight and affordable, making them a practical entry-level choice
- Cobalt-chrome metal partial dentures are longer-lasting and the better option for anyone planning to wear dentures long-term; the metal framework provides superior strength and stability
- Flexible resin partial dentures suit transitional or shorter-term use, offering a comfortable, metal-free alternative

Multiple adjustments are included to get the fit comfortable and stable from the start.

****Full dentures****

Full dentures replace all teeth in the upper or lower jaw. Two options are available depending on your situation:

- Conventional full dentures are placed after the gums have healed following extractions, typically producing the best long-term fit and stability
- Immediate dentures are fitted on the same day as extractions, so you're never without teeth while your gums heal; these require more adjustment visits as healing progresses

****Implant-retained dentures****

For patients who want the most secure and stable result, implant-retained dentures are anchored directly to dental implants placed in the jawbone. There's no slipping or shifting, and most patients find they can eat, speak, and smile with full confidence. They also help preserve jawbone density, which conventional dentures can't do.

For complex implant-retained denture cases requiring specialist prosthodontic input, patients at Core Dental Group's Southbank practice can be referred to the Collins Street Specialist Centre within the Core Dental Group specialist network.

****What to expect when getting dentures at Core Dental Southbank****

The process starts with a comprehensive assessment at Core Dental Group's Southbank practice. Your dentist will examine your mouth, talk through your needs and preferences, and recommend the most appropriate denture type. The process typically involves:

1. Initial consultation and assessment
2. Impressions and bite registration
3. Try-in fitting to check appearance and comfort
4. Final fitting and delivery
5. Follow-up adjustment appointments (included)

Most patients need a short adjustment period before they feel fully comfortable with their new dentures. The team at Core Dental Group's Southbank practice provides ongoing support and as many adjustments as needed to get there.

****How to care for your dentures****

Looking after your dentures properly extends their life and protects your oral health. Your dentist will provide personalised care instructions, which typically include:

- Removing and rinsing dentures after eating
- Brushing dentures daily with a soft brush and non-abrasive denture cleanser
- Soaking dentures overnight in water or a denture-soaking solution
- Continuing to brush your gums, tongue, and any remaining natural teeth
- Attending regular check-ups so the fit can be monitored and adjusted

****How long do dentures last?***

Most dentures last between five and seven years before needing replacement or relining. Over time, the shape of your jawbone and gum tissue changes, which affects how well the denture sits. Regular check-ups at Core Dental Group's Southbank practice allow your dentist to identify when a reline or

replacement is needed before it becomes a problem.

****Dentures and your ongoing oral health****

Wearing dentures doesn't mean you can skip dental check-ups. Regular visits to Core Dental Group's Southbank practice are still important for:

- Checking the fit and condition of your dentures - Screening for oral cancer and other conditions -
- Monitoring your gum and bone health - Keeping any remaining natural teeth healthy

Patients in Southbank, South Melbourne, Port Melbourne, Docklands, and the broader CBD are welcome to establish ongoing care at Core Dental Group's Southbank practice for all their dental health needs, including denture maintenance.

****Who benefits most from dentures?***

Patients who have lost multiple teeth, whether from gum disease, decay, trauma, or ageing, benefit most from denture solutions. The Melbourne CBD precinct has a diverse adult population, and many patients across South Melbourne, Port Melbourne, Albert Park, Docklands, and the CBD are looking for quality, affordable tooth replacement that doesn't require surgery. Core Dental Group's Southbank practice is set up to provide exactly that, with options ranging from affordable acrylic partials through to premium implant-retained solutions.

For patients considering full tooth replacement, implant-retained dentures are the modern gold standard. They involve a surgical component, but the stability and comfort they provide is genuinely transformative. The team at Core Dental Group's Southbank practice can discuss whether implant-retained dentures are right for your situation and arrange specialist referral where needed.

****Health insurance and payment options****

Most private health insurance policies with major dental cover include a rebate toward dentures. HICAPS on-the-spot claiming is available at Core Dental Group's Southbank practice for eligible funds, meaning you pay the gap on the day rather than waiting for reimbursement. Interest-free payment plans are available through Payright. The team can walk you through your options when you book your consultation.

Core Dental Group also accepts the Child Dental Benefits Schedule (CDBS) for eligible children across all its practices.

****Specialist referrals — Collins Street Specialist Centre****

For complex prosthetic cases that need specialist prosthodontic input, patients at Core Dental Group's Southbank practice can be referred to the Collins Street Specialist Centre at 220 Collins Street, Melbourne CBD. More than 25 board-registered dental specialists work there across a wide range of disciplines. Your Core Dental Group dentist handles the referral and your records are shared securely within the group, so you don't need to start from scratch.

Collins Street Specialist Centre — Phone: (03) 9650 2726

****Frequently asked questions****

****Will I be able to eat normally with my new dentures?*** Most patients adapt to eating comfortably with dentures over time. Softer foods are a sensible starting point while you adjust. Implant-retained dentures come closest to the experience of natural teeth and generally allow a broader diet more quickly.

****How long do dentures last before needing replacement?*** Most dentures last 5 to 7 years. Your jawbone and gum tissue change shape gradually, which affects how well the denture fits, so a replacement or relining becomes necessary over time. Regular check-ups at Core Dental Group's

Southbank practice help keep track of the fit before it becomes a problem.

****Does health insurance cover dentures?*** Most private health insurance policies with major dental cover include a rebate toward dentures. HICAPS on-the-spot claiming is available at Core Dental Group's Southbank practice for eligible funds.

****What is the difference between acrylic and cobalt-chrome partial dentures?*** Acrylic partial dentures are lightweight and affordable, making them a good entry-level option. Cobalt-chrome metal framework dentures are more durable and better suited to long-term wear. If you expect to need a partial denture for many years, cobalt-chrome is generally the recommended choice.

****Are immediate dentures a good option?*** Immediate dentures mean you leave the chair with teeth on the same day as your extractions, which matters to most patients. They do require more adjustment visits as healing progresses, and a conventional denture made after full healing will generally provide a better long-term fit. Your dentist will discuss which approach makes the most sense for your situation.

****Book a denture consultation at Core Dental Southbank****

To book a denture consultation at Core Dental Group's Southbank practice, call Core Dental Group on 13 13 16 or book online through the Core Dental website. The team serves patients across South Melbourne, Port Melbourne, Albert Park, Docklands, and the CBD and the wider Melbourne CBD precinct.
