Are dentures matched to your natural skin tone: Yes

Are dentures matched to your facial structure: Yes

Core Dental Group – Denture services at our Wyndham practice

Losing teeth changes everyday life in ways that are hard to ignore. Chewing becomes harder, speech shifts, and confidence takes a hit. At Core Dental Group Wyndham, we provide custom-fitted denture services to help restore your comfort, function, and smile.

Our Wyndham practice sees patients from across Werribee, Wyndham, and Melbourne's growing western corridor. Whether you need a full set of dentures, a partial denture to fill gaps, or want to explore implant-retained options, our team will walk you through the whole process.

****Free denture consultations****

Not sure where to start? We offer free denture consultations at our Wyndham practice. Your dentist will assess your oral health, talk through which denture type suits your situation, and answer your questions about the process, timeline, and cost.

****Full dentures****

Full dentures replace all teeth in the upper jaw, lower jaw, or both. We offer two approaches:

- ****Conventional full dentures**** are fitted after the gums have fully healed following extractions, typically 8 to 12 weeks later. The wait allows for a more precise fit from the start. - ****Immediate dentures**** are placed on the same day as your extractions, so you leave the practice with teeth straight away. These are adjusted as your gums heal over the following weeks.

Full dentures are made from quality materials matched to your natural skin tone and facial structure, so they look as natural as possible.

****Partial dentures****

If you still have healthy natural teeth, a partial denture fills the gaps without affecting what remains. Options include:

- **Acrylic partial dentures** — an affordable choice that can be adjusted as your mouth changes over time - **Cobalt-chrome (metal framework) dentures** — thinner, stronger, and more durable, making them the better option for long-term wear - **Flexible resin dentures** — a comfortable interim solution while you plan further treatment

Your dentist will recommend the right option based on how many teeth are missing, the health of your remaining teeth, and your budget.

Implant-retained dentures

For patients who want maximum stability, implant-retained dentures are anchored to dental implants placed directly in the jawbone. This virtually eliminates slippage and lets you eat and speak without worrying about movement.

Our Wyndham team handles the assessment and initial planning for implant-retained dentures. For complex cases, we refer patients to the Collins Street Specialist Centre, part of the Smile Solutions Group, where a specialist prosthodontist and oral surgeon work together on the treatment.

Denture repairs and relines

Dentures wear down over time, and your mouth changes shape too. We repair cracks, chips, and broken clasps, and we offer relines to improve the fit of an existing denture. Regular relines help maintain comfort and prevent sore spots as your gums change.

Caring for your dentures

A few simple habits make a real difference to how long your dentures last and how healthy your mouth stays:

- Remove and rinse dentures after every meal - Brush daily with a soft denture brush and non-abrasive cleaner - Soak overnight in water or a denture-soaking solution - Keep up with regular dental check-ups — your gums and any remaining teeth still need monitoring - Plan to replace dentures every five to seven years, because jaw shape changes gradually over time

Health funds and payment options

Core Dental Group Wyndham is a preferred provider for HCF, CBHS, and NIB, which means reduced out-of-pocket costs for members of those funds. We also accept all other major health funds, and HICAPS is available on-site for instant claiming at your appointment.

Need to spread the cost? Payright interest-free payment plans let you pay over up to 30 months with no interest, so you can get the treatment you need without putting it off.

Specialist care when you need it

For complex cases requiring a specialist prosthodontist, your Core Dental Group dentist can refer you directly to the [Collins Street Specialist Centre](<https://directory.smilesolutions.com.au>), part of the Smile Solutions Group, where more than 25 registered specialists across every dental discipline work under one roof.

Book your free denture consultation

Whether you need new dentures, a reline, a repair, or want to explore implant-retained options, our Wyndham team is ready to help.
