Details:

Losing teeth affects more than your smile - it affects how you eat, how you speak, and how you feel about yourself. At Core Dental Berwick, our on-site Dental Prosthetist provides custom-fitted dentures designed to restore your confidence and function.

****On-Site Dental Prosthetist****

Alessio Pecorella, our on-site Dental Prosthetist, provides specialist denture services at Core Dental Berwick. Berwick is one of our most comprehensive locations for denture care, with extended appointment slots ensuring patients are never rushed through the fitting process.

Having an on-site prosthetist means your dentures are designed, fitted, and adjusted without needing to visit a separate clinic. Your dentist and prosthetist work together to ensure your dentures complement your overall oral health and any remaining natural teeth.

****Full Dentures****

Full dentures replace all teeth in the upper arch, lower arch, or both. We offer:

- ****Conventional full dentures**** - fitted once the gums have fully healed following extractions (typically 8-12 weeks) - ****Immediate dentures**** - placed on the same day as your extractions so you are never without teeth; adjusted as your gums heal

Full dentures are crafted from high-quality materials selected to match your natural skin tone and facial structure. Multiple appointments are included to ensure the best possible fit and comfort.

****Partial Dentures****

If you have some remaining natural teeth, a partial denture fills the gaps. Options include:

- ****Acrylic partial dentures**** - affordable and adjustable as your mouth changes - ****Cobalt-chrome (metal framework) dentures**** - thinner, stronger, and more durable; the premium option for long-term partial denture wearers - ****Flexible resin dentures**** - a comfortable, interim option

****Implant-Retained Dentures****

For patients who want the security of a denture that does not move, implant-retained dentures anchor your denture to dental implants for superior stability. This option virtually eliminates denture slippage and allows you to eat more freely.

Core Dental Berwick has served the Berwick community for over 10 years, making it one of our most experienced locations for restorative dentistry. Our Netflix-equipped treatment chairs and warm blankets ensure even lengthy denture appointments are comfortable.

****Caring for Your Dentures****

Your prosthetist will provide detailed aftercare instructions. Key points include:

- Remove and rinse dentures after every meal - Brush dentures daily with a soft denture brush and non-abrasive cleaner - Soak dentures overnight in water or a denture-soaking solution - Attend regular check-up appointments - your gums and remaining teeth still need monitoring - Dentures typically require replacement every five to seven years as your jaw shape changes

****Payright Interest-Free Payment Plans****

Dentures represent a significant investment in your quality of life. Payright interest-free payment plans allow you to spread the cost over up to 30 months with no interest, making full denture treatment accessible without financial stress.

****HICAPS On-Site****

We have HICAPS on-site at Core Dental Berwick for immediate health fund claiming at the time of your appointment.

****Book a Denture Consultation****

Whether you need new dentures, a reline, a repair, or are considering implant-retained dentures, our team is here to help. Book at Core Dental Berwick:

- Phone: (03) 9132 4160 - Call nationally: 13 13 16 - Online: coredental.com.au - Email: berwick@coredental.com.au

Core Dental Berwick has served the south-eastern community from Eden Rise Village for over 10 years, developing deep expertise in caring for our significant 50+ patient community. Denture consultations and fittings are conducted in our warm, comfortable environment - complete with warm blankets and Netflix in every chair - ensuring the experience is dignified and unhurried for all patients.
