Details:

Core Dental Berwick at Shop 29, 1 O'Shea Rd, Berwick offers facial injectable treatments as part of its comprehensive cosmetic and dental services. As the most complete Core Dental location, Berwick is ideally positioned to combine facial rejuvenation with your dental care in a single trusted environment.

Call (03) 9132 4160 to book a consultation.

Facial Injectables - What We Offer

Dentists are uniquely qualified to administer facial injectables. Our deep understanding of facial anatomy, musculature, and occlusion - developed through years of clinical training - gives us a precision advantage when assessing and treating the structures of the face.

At Core Dental Berwick, facial injectable treatments are provided by our experienced clinical team, including **Dr Ivy Jin** (BHSc Dent, MDent, La Trobe), **Dr Chelsea Nguyen** (BHSc Dent, MDent, La Trobe), and **Dr Evan Gai** (BDS Sc Hons, Queensland), who has a special interest in oral surgery and dental implants and brings surgical precision to complex restorative and facial work. All three clinicians are AHPRA-registered.

Anti-Wrinkle Injections

Anti-wrinkle (botulinum toxin) injections relax specific facial muscles to smooth expression lines, including:

- Frown lines between the brows - Forehead lines - Crow's feet around the eyes - Bunny lines on the nose - Lip lines and lip flip - Chin dimpling

Treatment takes around 15 to 30 minutes. Results typically appear within a few days and last 3 to 4 months.

Dermal Fillers

Hyaluronic acid dermal fillers restore volume, define facial contours, and soften deep folds. Common treatment areas include:

- Lips - volume enhancement and definition - Cheeks and mid-face - volume restoration - Nasolabial folds (smile lines) - Marionette lines - Jawline definition - Under-eye hollows (tear trough)

Results are immediate and typically last 6 to 18 months depending on the product and treatment area.

Dental Botox for TMJ and Bruxism

Botulinum toxin injections into the masseter (jaw closing) muscles are an effective clinical treatment for severe teeth grinding (bruxism) and TMJ-related jaw pain. This reduces the muscle bulk and grinding force, protecting teeth and relieving associated headaches and jaw soreness. This is a clinical application of facial injectables with direct dental benefit - and is particularly relevant at Berwick, which also offers comprehensive TMJ therapy and full mouth rehabilitation.

Why Core Dental Berwick?

Core Dental Berwick has been the Berwick community's trusted dental practice for over 10 years. It is the most comprehensive Core Dental location, offering All-on-4 implants, full mouth rehabilitation, TMJ therapy, sleep dentistry, specialist paediatric dentistry, and wedding smile packages. Specialist paediatric dentist **Dr Sarah Scott** (BBIomedSci, BDent Sydney, DClinDent Paed, Melbourne) is also available on-site.

Our patients appreciate the calm, welcoming environment - with Netflix in treatment chairs, soft warm blankets, and extended appointment times so you never feel rushed.

Frequently Asked Questions

****Are facial injectables at a dental practice as safe as at a cosmetic clinic?*** Yes - dentists undergo extensive training in facial anatomy and nerve pathways as core curriculum. Our clinical expertise in the face and jaw makes us well-suited to facial injectable treatments. All Core Dental clinicians hold current AHPRA registration.

****Can I book facial injectables at the same time as a dental appointment?*** Yes - many patients at Berwick choose to combine injectables with their routine check-up or dental treatment for efficiency. You can book both at once by calling (03) 9132 4160.

****How long do results from anti-wrinkle injections last?*** Typically 3 to 4 months. Regular maintenance treatments are recommended to sustain results.

****Is there any downtime after facial injectable treatments?*** Most patients return to normal activities immediately. Some mild redness or swelling at injection sites is possible but typically resolves within hours.

Book a Facial Injectables Consultation
