Details:

Core Dental Glenferrie at 827 Glenferrie Rd, Hawthorn - opening June 2026 - offers facial injectable treatments alongside comprehensive dental care. Combining cosmetic dentistry with facial aesthetics under one roof, our team can help you achieve a naturally refreshed appearance to complement your smile. We welcome patients from Hawthorn, Kew, Camberwell, Auburn, Glenferrie, and surrounding inner-eastern suburbs.

Why Dentists for Facial Injectables?

Dentists are among the most qualified practitioners for facial injectable treatments. Our clinical training covers the anatomy of the face - muscles, nerves, blood vessels, and bone structures - in exceptional detail. Years of precise work within the oral and facial region translate directly to safe, accurate administration of anti-wrinkle injections and dermal fillers. This anatomical expertise is a genuine advantage over many cosmetic-only providers.

Treatments Available

Anti-Wrinkle Injections

Botulinum toxin treatments relax overactive facial muscles to smooth existing lines and help prevent new ones from forming. Common treatment areas include:

- Forehead lines - Frown lines (between the brows) - Crow's feet - Bunny lines - Lip lines and lip flip - Chin dimpling

Treatments take 15 to 30 minutes. Results become visible within days and typically last 3 to 4 months.

Dermal Fillers

Hyaluronic acid fillers restore volume and structure to areas of the face that have lost fullness over time. Treatment areas include:

- Lips - definition and volume enhancement - Cheeks - mid-face volume and lift - Nasolabial folds and marionette lines - Jawline definition

Results are immediate and last 6 to 18 months depending on the product and area treated.

Masseter Botox for Teeth Grinding and TMJ

Injecting botulinum toxin into the masseter (jaw-closing) muscles is an effective clinical treatment for teeth grinding and TMJ-related pain. It reduces grinding force significantly, protecting teeth from wear and relieving associated headaches and facial tension. This crossover between dental health and facial

aesthetics is something only a dental practice can deliver seamlessly.

Combining Dental and Facial Aesthetics

Many patients find that addressing both their smile and facial appearance in a single visit is convenient and produces the most harmonious result. A smile makeover paired with targeted anti-wrinkle treatment or lip enhancement creates a balanced, natural-looking rejuvenation. Our Glenferrie team can discuss a combined treatment plan tailored to your goals.

Core Dental Glenferrie - Part of a Larger Network

Core Dental Glenferrie is part of the Core Dental Group - a network of 9 locations across Melbourne engaging over 80 clinicians, including 25+ specialists, and serving more than 300,000 patients over 33 years. For patients seeking the network's primary facial injectables specialist, referrals can be arranged within the group.

Book a Consultation

Call Core Dental Glenferrie to book your facial injectables consultation. No separate dental appointment is required - you can book injectables independently or combine them with your regular check-up.
