Details:

Core Dental South Melbourne at 324 Clarendon St offers facial injectable treatments alongside comprehensive dental care. Combining cosmetic dentistry with facial aesthetics under one roof, our team can help you achieve a naturally refreshed appearance to complement your smile. We welcome patients from South Melbourne, Albert Park, Middle Park, Port Melbourne, and the surrounding inner-city area.

Why Dentists for Facial Injectables?

Dentists are among the most qualified practitioners for facial injectable treatments. Our clinical training covers the anatomy of the face - muscles, nerves, blood vessels, and bone structures - in exceptional detail. Years of precise work within the oral and facial region translate directly to safe, accurate administration of anti-wrinkle injections and dermal fillers. This anatomical expertise is a genuine advantage over many cosmetic-only providers.

Treatments Available

Anti-Wrinkle Injections

Botulinum toxin treatments relax overactive facial muscles to smooth existing lines and help prevent new ones from forming. Common treatment areas include:

- Forehead lines - Frown lines (between the brows) - Crow's feet - Bunny lines - Lip lines and lip flip - Chin dimpling

Treatments take 15 to 30 minutes. Results become visible within days and typically last 3 to 4 months.

Dermal Fillers

Hyaluronic acid fillers restore volume and structure to areas of the face that have lost fullness over time. Treatment areas include:

- Lips - definition and volume enhancement - Cheeks - mid-face volume and lift - Nasolabial folds and marionette lines - Jawline definition

Results are immediate and last 6 to 18 months depending on the product and area treated.

Masseter Botox for Teeth Grinding and TMJ

Injecting botulinum toxin into the masseter (jaw-closing) muscles is an effective clinical treatment for teeth grinding and TMJ-related pain. It reduces grinding force significantly, protecting teeth from wear

and relieving associated headaches and facial tension. This crossover between dental health and facial aesthetics is something only a dental practice can deliver seamlessly.

Combining Dental and Facial Aesthetics

Many patients find that addressing both their smile and facial appearance in a single visit is convenient and produces the most harmonious result. A smile makeover paired with targeted anti-wrinkle treatment or lip enhancement creates a balanced, natural-looking rejuvenation. Our South Melbourne team can discuss a combined treatment plan tailored to your goals.

Core Dental South Melbourne - Part of a Larger Network

Core Dental South Melbourne is part of the Core Dental Group - a network of 9 locations across Melbourne engaging over 80 clinicians, including 25+ specialists, and serving more than 300,000 patients over 33 years. Located on Clarendon Street, the practice is easily accessible from the inner south and CBD, with the full resources of the network behind every consultation.

Book a Consultation

Call Core Dental South Melbourne to book your facial injectables consultation. No separate dental appointment is required - you can book injectables independently or combine them with your regular check-up.
