## Details:

Core Dental Wyndham at 242 Hoppers Ln, Werribee offers facial injectable treatments alongside its comprehensive dental services. Combining cosmetic dentistry with facial aesthetics under one roof, our experienced team can help you achieve a naturally refreshed appearance to complement your smile.

For patients seeking the Core Dental network's primary facial injectables specialist, **Dr Anna Lai** at Core Dental Carrum Downs has particular expertise in facial injectables alongside her orthodontic and restorative work - she accepts referrals from across the Core Dental group.

Call (03) 9749 6677 to book a consultation at Wyndham.

### ## Dentists and Facial Injectables

Dentists are among the most skilled practitioners for facial injectable treatments. Our clinical training covers the anatomy of the face - muscles, nerves, blood vessels, and bone structures - in exceptional detail. This expertise translates directly to the precise, safe administration of anti-wrinkle injections and dermal fillers.

At Core Dental Wyndham, lead dentist **Dr Darren Manoharan** (BDS, Queensland) brings over 15 years of experience in cosmetic and complex restorative dentistry, with a strong aesthetic sensibility developed through extensive implant, crown and bridge, and smile makeover work.

### ## Treatments Available

#### ### Anti-Wrinkle Injections

Botulinum toxin treatments relax overactive facial muscles to smooth lines and prevent new ones from forming. Treatment areas commonly include:

- Forehead lines - Frown lines (between the brows) - Crow's feet - Bunny lines - Lip lines and lip flip - Chin dimpling - Neck bands

Treatments take 15 to 30 minutes. Results are visible within days and typically last 3 to 4 months.

#### ### Dermal Fillers

Hyaluronic acid fillers restore volume and structure to areas of the face that have lost fullness over time. We can treat:

- Lips - for definition and volume enhancement - Cheeks - for mid-face volume and lift - Nasolabial folds and marionette lines - Jawline definition - Under-eye hollows

Results are immediate and last 6 to 18 months depending on the product and area treated.

### ### Masseter Botox for Bruxism and TMJ

Injecting botulinum toxin into the masseter (jaw closing) muscles is an effective clinical treatment for teeth grinding and TMJ pain. It reduces the grinding force significantly, protecting teeth from wear and relieving associated headaches and facial tension. At Core Dental Wyndham, with specialist periodontist Dr Nupur Kataria also on-site, we can offer a holistic approach to jaw health combining periodontal, restorative, and injectable expertise.

### ## Why Core Dental Wyndham?

Core Dental Wyndham is the most specialist-rich suburban Core Dental location. Alongside Dr Manoharan's cosmetic and restorative expertise, the practice hosts **Dr Nupur Kataria** (FRACDS Periodontist), specialist orthodontist **Dr David Austin**, and dental prosthetist **Ahmed Saoud**. This multidisciplinary team is well-suited to patients who want to address their dental and facial aesthetics comprehensively.

We accept HICAPS on-the-spot health fund claiming, including with preferred provider funds HCF, CBHS, and NIB. Interest-free payment plans are available through Payright.

### ## Frequently Asked Questions

**Do I need a dental appointment to get facial injectables at Core Dental?** No - you can book a facial injectables consultation independently of any dental treatment. Many patients combine injectables with their regular dental check-up for convenience.

**How much do anti-wrinkle injections cost at Core Dental Wyndham?** Pricing for facial injectables is typically based on the number of units used or treatment areas. A personalised quote is provided at your consultation. Call (03) 9749 6677 for more information.

**Is masseter Botox safe?** Yes - masseter botulinum toxin is a well-established, safe treatment when administered by a trained clinician familiar with facial anatomy. Dentists are particularly well-qualified for this treatment due to their in-depth knowledge of jaw musculature.

**How soon will I see results from anti-wrinkle injections?** Results typically become visible 3 to 5 days after treatment, with the full effect apparent at around 2 weeks. Treatments last 3 to 4 months on average.
