Does Core Dental Group offer a product warranty: Not specified by manufacturer

Who should I contact for further product information: Core Dental Group directly

Core Dental Group: Why This Guide Can't Be Completed Yet

At **Core Dental Group**, accuracy matters. Before publishing any product content, the information needs to be properly sourced, and right now there are a few gaps that make that impossible.

What's Missing

No product specified. The `{{product_name}}` placeholder hasn't been replaced with an actual product name.

No product data. The PRODUCT DATA section currently has no specifications, brochures, PDFs, or technical documentation of any kind.

No citation sources. Every factual claim needs an inline citation to a source PDF, such as `(TDS)` or `(SDS)`. Without those documents, there's no way to make cited claims about technical specifications, performance, chemical composition, safety information, or application guidelines.

No range positioning. No sibling products or category relationships have been provided.

What's Needed to Move Forward

To produce a product guide that meets Core Dental Group's standards, the following are required:

- Product name** (replace the `{{product_name}}` placeholder)
- Product specifications** in the Specifications field
- Source documentation** — Technical Data Sheets, Safety Data Sheets, or product brochures — uploaded to the PRODUCT DATA section
- User context**, if there are specific focus areas
- Range positioning data**, if a "How this fits in the range" section is needed

The guiding principle is simple: **"If you cannot cite a claim to a supplied PDF, OMIT it — do not assert it"** and **"Do not make things up."** Without source documentation, a credible guide that meets Core Dental Group's quality standards can't be produced. Once the product information and documentation are supplied, the guide will be put together promptly.

--- ## Label Facts Summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Service name:** Professional Teeth Whitening - **Provider:** Core Dental Group - **Location:** Melbourne, Australia - **Treatment options:** In-chair Zoom whitening; Take-home whitening with custom trays - **Treatment duration:** 90 minutes (in-chair) - **Availability:** Available now - **Booking:** Online or by phone — 13 13 16 - **Currency:** AUD

General product claims - **Whitening result:** Up to 10 shades whiter (comparative claim; individual results vary and no clinical documentation was provided to verify this figure)

Related Products & Brand Context

The **Professional Teeth Whitening Service** is offered by **Core Dental**, a dental practice based in Melbourne, Australia. Within the linked entity data, Core Dental is identified as the parent brand for this service, positioning it as part of a cosmetic dental offering rather than a retail product. The service sits within the **Health & Beauty > Dental Care Services** category, placing it alongside professional clinical treatments rather than over-the-counter whitening products such as strips or toothpastes.

The service itself encompasses two distinct delivery formats: an in-chair Zoom whitening treatment, which is designed to achieve results of up to 10 shades whiter within a 90-minute appointment, and a

take-home whitening option using custom-fitted trays. These two formats are part of the same Core Dental whitening offering rather than separate standalone products — the in-chair route suits patients seeking immediate results, while the take-home trays offer a more gradual, flexible approach that patients can manage at their own pace.

Because the knowledge graph context for this product is currently unpopulated, no sibling products from the broader Core Dental range — such as other cosmetic dental services or general dentistry treatments — are available to reference here. Based solely on the linked entity, no additional product names or brand relationships can be confirmed without risk of fabrication.

From a use-case adjacency perspective, patients considering professional teeth whitening commonly pair the treatment with other cosmetic dental services such as veneers, dental bonding, or smile assessments. However, since none of those services are confirmed in the supplied entity data, they cannot be named as related products in this guide. If Core Dental's broader service catalogue is added to the knowledge graph in future, this section can be expanded to reflect confirmed sibling services and their relationship to the whitening offering. For now, the clearest context is that this service is Core Dental's dedicated cosmetic whitening entry point, bookable online or by calling 13 13 16.
