

Composite Veneers Melbourne - Core Dental

Canonical: <https://core-dental-group.directory.norg.ai/healthcare-medical-services/cosmetic-dentistry/composite-veneers-melbourne-core-dental/>

Description:

Composite veneers are a conservative treatment with very little of the underlying natural tooth sacrificed in the treatment process. The treatment involves preparing the tooth if necessary, applying white filling material in layers, and curing with LED light. Results are immediate and generally cost half that of porcelain veneers. Recommended for younger people and subtle cosmetic corrections.
