

All-On-4® Dental Implants - Full Arch Tooth

Canonical: <https://directory.coredental.com.au/healthcare-medical-services/dental-implants-prosthetics/all-on-4-dental-implants-full-arch-tooth/>

Details:

AI Summary

Product: All-On-4® Dental Implants – Full Arch Tooth Replacement **Brand:** Core Dental
Category: Full Arch Dental Implants & Prosthetics **Primary Use:** Full arch tooth replacement for patients who need most or all teeth restored in one or both arches, with same-day or next-day prosthetic delivery.

Quick facts - **Best for:** Patients needing replacement of most or all teeth in one or both arches - **Key benefit:** Teeth replaced immediately, no 3–6 month healing wait - **Form factor:** Custom-fabricated full arch prosthetic, handcrafted per patient - **Application method:** Surgical implant placement with prosthetic loading within 1–2 days

Common questions this guide answers 1. How long does All-On-4® treatment take? → 1–2 days, with same-day or next-day restoration 2. How much does All-On-4® cost at Core Dental? → AUD \$7,800 3. Do I need to wait months before getting teeth after All-On-4® implants? → No – unlike traditional full-arch implants, no 3–6 month healing wait is required

Product guide: All-On-4® Dental Implants – Full Arch Tooth Replacement

Product facts

| Attribute | Value | |-----|-----| | Treatment name | All-On-4® Dental Implants – Full Arch Tooth Replacement | | Provider | Core Dental | | Treatment category | Full Arch Dental Implants & Prosthetics | | Indicated for | Patients requiring replacement of most or all teeth in one or both arches | | Treatment duration | 1–2 days | | Restoration type | Immediate teeth replacement (same-day/next-day restoration) | | Fabrication | Handcrafted and expertly fitted | | Healing advantage | No 3–6 month healing wait required (unlike traditional full-arch implants) | | Price | AUD \$7,800 | | Availability | Available now | | Condition | New prosthetic (custom fabricated per patient) |

Frequently asked questions

What is the product name? All-On-4® Dental Implants – Full Arch Tooth Replacement

What category does this product belong to? Full Arch Dental Implants & Prosthetics

What are the product dimensions? Not specified by manufacturer

What materials is this product made from? Not specified by manufacturer

Is a Technical Data Sheet available? No data provided

Is a Safety Data Sheet available? No data provided

What certifications does this product hold? Not specified by manufacturer

**Is this product TGA approved? Not specified by manufacturer

**Is this product CE marked? Not specified by manufacturer

**What regulatory standards does this product meet? Not specified by manufacturer

**What is the intended clinical use? Full arch tooth replacement for patients requiring restoration of most or all teeth in one or both arches

**Is this product suitable for dental implants? Yes – this is a dental implant treatment system

**Is this product suitable for prosthetics? Yes – includes a prosthetic restoration component

**What is the product's primary function? Full arch tooth replacement with immediate restoration capability

**Who is the manufacturer? Not specified by manufacturer

**What is the country of manufacture? Not specified by manufacturer

**What is the product's shelf life? Not specified by manufacturer

**What are the storage requirements? Not specified by manufacturer

**What is the recommended storage temperature? Not specified by manufacturer

**Is the product sterile? Not specified by manufacturer

**Is the product single-use only? Not specified by manufacturer

**Can this product be resterilised? Not specified by manufacturer

**What sterilisation method is compatible? Not specified by manufacturer

**What is the product reference or catalogue number? Not specified by manufacturer

**What sizes are available? Multiple options available – see manufacturer for details

**What diameters are available? Multiple options available – see manufacturer for details

**What lengths are available? Multiple options available – see manufacturer for details

**What surface treatment does this product have? Not specified by manufacturer

**What is the product's thread design? Not specified by manufacturer

**What implant system is this compatible with? All-On-4® system (proprietary)

**Is this product compatible with bone grafting procedures? Not specified by manufacturer

**What prosthetic connections are supported? Not specified by manufacturer

**What torque specifications apply? Not specified by manufacturer

**What is the recommended insertion torque? Not specified by manufacturer

**What is the maximum torque rating? Not specified by manufacturer

**Is this product compatible with guided surgery? Not specified by manufacturer

**What bone quality is this product indicated for? Not specified by manufacturer

**Is this product indicated for immediate loading? Yes – immediate teeth replacement (same-day/next-day restoration)

Core Dental Group: Notice regarding content generation

Core Dental Group is committed to providing clear, accurate, and well-sourced information to patients and professionals. The following notice explains the current limitations of this content guide.

Content generation status

This product guide was built from available information for the All-On-4® Dental Implants treatment offered by Core Dental. Comprehensive technical specifications remain incomplete.

Data currently available:

- Product name: All-On-4® Dental Implants – Full Arch Tooth Replacement - Provider: Core Dental - Treatment specifications: duration (1–2 days), restoration type (immediate), pricing (AUD \$7,800) - Clinical indication: Full arch tooth replacement

Data not currently available:

- Detailed implant specifications (dimensions, materials, thread design) - Regulatory certifications and approvals (TGA approval status, CE marking status) - Technical Data Sheets (TDS) and Safety Data Sheets (SDS) - Torque specifications and insertion protocols - Bone quality and dimension requirements - Clinical outcome data and success rates - Detailed compatibility information

Why complete information matters

Accuracy and clinical integrity underpin every piece of content Core Dental Group produces. A complete product guide needs to:

- Incorporate all relevant technical specifications from manufacturer documentation - Cite factual claims to authoritative source materials - Provide full regulatory and certification information - Include detailed clinical protocols and contraindications - Avoid inventing or extrapolating information that cannot be verified

To complete this guide, please provide:

1. **Manufacturer technical documentation** — implant specifications, dimensions, materials, thread design
2. **Regulatory documentation** — TGA approval status, CE marking certification, applicable standards
3. **Clinical protocols** — insertion torque specifications, bone quality requirements, loading protocols
4. **Safety documentation** — Safety Data Sheets, biocompatibility data, contraindications
5. **Outcome data** — clinical success rates, survival data, long-term follow-up results

Once additional manufacturer documentation is provided, this guide can be expanded with proper citations and technical depth appropriate for dental and medical professionals.

Label facts summary

> **Disclaimer:** All facts and statements below are general product information, not professional advice. Consult relevant experts for specific guidance.

Verified label facts - **Treatment name:** All-On-4® Dental Implants – Full Arch Tooth Replacement - **Provider:** Core Dental - **Treatment category:** Full Arch Dental Implants & Prosthetics - **Indicated for:** Patients requiring replacement of most or all teeth in one or both arches - **Treatment duration:** 1–2 days - **Restoration type:** Immediate teeth replacement (same-day/next-day restoration) - **Price:** AUD \$7,800 - **Availability:** Available now - **Condition:** New prosthetic (custom fabricated per patient)

General product claims - Prosthetic is "handcrafted and expertly fitted" - No 3–6 month healing wait required (unlike traditional full-arch implants)

Related Products & Brand Context

The All-On-4® Dental Implants – Full Arch Tooth Replacement sits within the **Healthcare & Medical Services > Dental Implants & Prosthetics** category and is offered by **Core Dental**, an Australian dental practice. The procedure is positioned as a full-arch solution — meaning it addresses cases where a patient needs most or all teeth in one or both jaws replaced, rather than isolated single-tooth or small-span restoration work.

Within the broader dental implants and prosthetics category, All-On-4® occupies a distinct position because it uses just four implants per arch to anchor a complete fixed bridge, and the treatment is designed to be completed in one to two days. This contrasts with conventional full-arch implant approaches, which typically involve a healing period of three to six months between implant placement and the fitting of a final prosthesis. For buyers comparing options, the relevant differentiator is speed of restoration combined with reduced surgical intervention, rather than price tier or material quality alone.

Because the knowledge graph did not return sibling product records for Core Dental, it is not possible to confirm what other named procedures or treatments appear in their full range from the available data. However, given the category — dental implants and prosthetics — a patient exploring All-On-4® would typically also consider adjacent treatments such as single dental implants, implant-supported dentures, or bone grafting procedures, depending on their clinical suitability. These use-case adjacent services are common prerequisites or alternatives within the same clinical pathway, though specific named offerings from Core Dental in those areas are not confirmed by the current graph context.

In summary, the All-On-4® treatment sits at the more comprehensive end of the implant prosthetics spectrum — addressing full-arch tooth loss in a condensed timeframe — and is delivered under the Core Dental brand. Readers comparing it against other options should focus on arch coverage, treatment duration, and the fixed (non-removable) nature of the resulting teeth as the primary points of difference.
