

# Dental Crowns - Core Dental Melbourne

Canonical: <https://directory.coredental.com.au/healthcare-medical-services/dental-services/dental-crowns-core-dental-melbourne/>

## Description:

When there is insufficient dental enamel to allow restoration with a dental veneer, a crown may be successfully used instead. A dental crown, sometimes referred to as a cap, is a solution to protect a damaged or root-treated tooth, or can be used in conjunction with an implant to replace a missing tooth. The shape, size, colour and surface characteristics of a crown are precisely matched to surrounding teeth and provide a seamless and lasting restoration.
