

# Dental Implants Melbourne - Core Dental

Canonical: <https://directory.coredental.com.au/healthcare-medical-services/dental-services/dental-implants-melbourne-core-dental/>

## Description:

Dental implants is the process of replacing missing teeth (or tooth) that cannot be saved by conventional means and needs to be removed. Dental implants are a commonly used treatment option to replace a missing tooth or a series of missing teeth. They can be considered as an alternative to a bridge or a fixed denture. A dental implant is a titanium screw that is surgically inserted into the jaw bone. Over time, the screw fuses with the underlying bone and behaves like the root of a natural tooth.
