Details:

Invisalign at Core Dental Group - Melbourne's Blue Diamond Provider

Core Dental Group is proud to hold **Invisalign Blue Diamond Status** - the highest Invisalign provider tier available in Australia. This recognition places Core Dental among a small group of elite dental practices in the country, reflecting the extraordinary volume and expertise that comes from completing over 750 Invisalign treatments per year across the group.

Whether you have mild crowding, more complex spacing issues, or a full bite correction to address, Invisalign at Core Dental gives you access to the technology, clinical expertise, and ongoing support to achieve the smile you want - conveniently, at a location near you.

Available at all 7 Core Dental locations. Phone: 13 13 16 | Website: coredental.com.au *Free consultation available.*

What is Invisalign?

Invisalign is a system of clear, removable aligners made from smooth, BPA-free plastic. Unlike traditional braces with brackets and wires, Invisalign aligners are virtually invisible when worn, can be removed for eating and cleaning, and are comfortable against the gums and cheeks.

Treatment involves wearing a series of custom-made aligners, each shifting your teeth incrementally toward the planned final position. Aligners are changed every 1-2 weeks as directed by your dentist. Most patients wear their aligners for 22 hours per day, removing them only to eat, drink (anything other than water), and brush.

Why Choose Core Dental for Invisalign?

Blue Diamond Status - Australia's Highest Tier

Blue Diamond is the top Invisalign provider recognition in Australia, awarded to practices with exceptional treatment volume and clinical outcomes. Core Dental's Blue Diamond Status means:

- More cases treated than the vast majority of dental practices in Australia - Deep familiarity with all Invisalign product types and clinical scenarios - Direct access to Invisalign support and training resources - More experienced clinical eye for treatment planning

Specialist Orthodontists On-Site

For complex cases requiring the highest level of orthodontic expertise, Core Dental has AHPRA-registered specialist orthodontists on-site at Caroline Springs and Wyndham:

****Dr David Austin**** - BSc (Melbourne), MDS Orth (University of Hong Kong), MOrth RCS (Edinburgh) - Specialist Orthodontist. Dr Austin is a Member of the Royal College of Surgeons Edinburgh (Orthodontics) and a member of the World Federation of Orthodontists and European Orthodontic Society.

Experienced Invisalign general dentists are available at all seven locations for straightforward to moderate cases.

7 Convenient Locations

With seven locations across Melbourne, you can start your Invisalign treatment at the Core Dental practice most convenient to your home or workplace. All locations offer the same Blue Diamond standard of Invisalign care.

Price Match Guarantee

Core Dental will match any comparable written quote from a registered specialist orthodontist and beat it by ****5%****. If you have received a quote elsewhere, bring it in.

Digital Scanning - No Impressions

Treatment planning begins with an iTero digital intraoral scan - a fast, comfortable, impression-free way to capture the exact shape of your teeth. The iTero scan feeds directly into Invisalign's ClinCheck software to generate your digital treatment simulation.

ClinCheck Preview

Before committing to treatment, you will see a ClinCheck digital simulation showing the anticipated movement of your teeth from start to finish. This preview helps you understand what treatment involves and what the planned outcome looks like.

Invisalign Pricing at Core Dental Group

| Invisalign Type | Price | |---|---| | Invisalign Express | from \$4,400 | | Invisalign Lite | from \$7,800 | | Invisalign Moderate | from \$9,600 | | Invisalign Comprehensive | from \$11,300 |

Invisalign Products Available

Invisalign Express

For very minor tooth movement or relapse after previous orthodontic treatment. Up to 7 aligners. Treatment duration approximately 3 months.

****Suitable for:**** Mild crowding, spacing, or minor relapse after braces. ****From \$4,400.****

Invisalign Lite

For mild to moderate tooth movement. Up to 14 aligners. Treatment duration typically 6-9 months.

****Suitable for:**** Mild to moderate crowding, spacing, or rotation. ****From \$7,800.****

Invisalign Moderate

For a wide range of alignment issues. 18-36 aligners. Treatment duration typically 12-18 months.

****Suitable for:**** Moderate crowding, spacing, and bite issues. ****From \$9,600.****

Invisalign Comprehensive

Unlimited aligners. For complex cases including significant bite issues, severe crowding, and cases requiring specialist orthodontic management.

****Suitable for:**** Complex bite and alignment correction. ****From \$11,300.****

Invisalign Teen

Identical to adult Invisalign with additional features designed for teenagers: - ****Compliance indicators**** - Small blue dots that fade as aligners are worn, providing a visual check on wear time - ****Additional spare aligners**** - In case of loss - Suitable for teenagers from approximately age 13 upward when dentition is sufficiently developed

Available at Caroline Springs, Epping, Wyndham, Berwick, and other locations.

What is Included in Your Invisalign Package?

Every Core Dental Invisalign package includes:

- Complimentary initial consultation to assess suitability - Diagnostic records including iTero digital scan
- ClinCheck digital simulation (valued at \$300) - preview your outcome before committing - Rebate-only OPG and lateral cephalometric X-rays - All aligner sets for your prescribed treatment - Progress appointments every 6-8 weeks throughout treatment - Removable and/or fixed retainers on completion

How Invisalign Treatment Works - Step by Step

****Step 1 - Free Consultation**** Book a complimentary 30-minute consultation at your nearest Core Dental location. Your dentist will examine your teeth, discuss your goals, and advise whether Invisalign is suitable for you.

****Step 2 - Digital Records**** If you proceed, your dentist takes an iTero digital scan (no impression material), photographs, and X-rays. These are used to design your treatment.

****Step 3 - ClinCheck Preview**** You will see a digital simulation of your tooth movement from start to finish. You can discuss and refine the planned outcome before any aligners are made.

****Step 4 - Aligners Made**** Once you approve the ClinCheck simulation, your custom aligners are manufactured and delivered to Core Dental.

****Step 5 - Start Treatment**** At your fitting appointment, your dentist fits any necessary attachments (small tooth-coloured bumps that help aligners grip teeth), shows you how to insert and remove aligners, and explains care instructions.

****Step 6 - Progress Appointments**** Appointments every 6-8 weeks to monitor progress, provide the next sets of aligners, and address any questions.

****Step 7 - Retention**** After your last aligner, retainers are provided to hold your new smile in place. Retainers are critical - teeth can gradually drift back without them.

Important: Wear Your Aligners 22 Hours Per Day

The most important factor in Invisalign success is consistent wear. Aligners must be worn for 22 hours per day. They are only removed to eat, drink (except water), and brush. Eating or drinking with aligners in risks staining and breakage. Insufficient wear time extends treatment and may compromise results.

Invisalign for Teenagers and Children

Children's first orthodontic assessment is recommended from age 6-7 when adult teeth begin to emerge. Early assessment allows the orthodontist to monitor development and plan intervention at the right time.

Invisalign Teen is suitable for most teenagers with a sufficiently developed adult dentition. Specialist orthodontist Dr David Austin can provide assessments for complex or early presentation cases at Caroline Springs and Wyndham.

Book a Free Invisalign Consultation

The first step is a complimentary consultation at your nearest Core Dental location. There is no obligation and no cost.
