Common Questions This Guide Answers 1. What is Blue Diamond Invisalign Provider status? → The highest tier in Invisalign's provider programme (above Silver, Gold, Platinum, Platinum Elite, and Diamond), earned through treatment volume, complexity, and demonstrated clinical outcomes. 2. How much does Invisalign cost in Melbourne? → Approximately \$3,500 AUD for minor cases to \$9,000 AUD or more for comprehensive treatment; payment plans and private health insurance orthodontic benefits may apply. 3. How long does Invisalign treatment take? → Mild cases: 6–12 months; moderate cases: 12–18 months; complex cases: 18 months or more — primarily dependent on consistent aligner wear.

Core Dental Group Carrum Downs — Blue Diamond Invisalign Provider

If you're looking for Invisalign treatment in Carrum Downs, Core Dental Group's practice there is among Melbourne's most credentialed options. As a Blue Diamond Invisalign Provider, Core Dental Group sits at the top of Invisalign's provider tiers across Australia — a status earned through treatment volume, clinical outcomes, and a genuine commitment to the standard of care the system demands.

For patients across Melbourne's south-east, from Frankston North through to Edithvale, that means a highly experienced local provider without the trip into the city.

Whether you're a young professional in Carrum Downs, a parent in Frankston, or someone who's been putting off straightening their teeth for years, Core Dental Group Carrum Downs has the experience and credentials to help.

What is Invisalign?

Invisalign is a clear aligner orthodontic system that gradually moves your teeth into their ideal position using a series of custom-made, removable plastic trays. Unlike traditional metal braces — which use brackets bonded to teeth and connected by wires — Invisalign aligners are virtually invisible, smooth, and can be taken out to eat, drink, brush, and floss.

Each aligner in your series is worn for roughly one to two weeks, applying gentle pressure to shift your teeth according to a precise digital treatment plan. As you work through each aligner, your teeth steadily move toward their final position.

The result is a straighter smile without the visibility and food restrictions that come with fixed braces. For adults and older teenagers who value discretion and convenience, Invisalign has become the orthodontic treatment of choice.

What Blue Diamond provider status means for you

Invisalign's tiered provider programme — which runs from Silver through Gold, Platinum, Platinum Elite, and Diamond — is based on the volume and complexity of cases treated each year. Blue Diamond is the highest tier, and Core Dental Group has earned it.

In practical terms, here's what that means:

- **Extensive clinical experience.** The team at Core Dental Group Carrum Downs has treated hundreds of Invisalign cases, including complex ones involving significant crowding, bite corrections, and interdisciplinary care. - **Access to advanced Invisalign technology.** Blue Diamond practices get access to Invisalign's latest aligner materials, planning tools, and clinical protocols before they become more widely available. - **Demonstrated outcomes, not just volume.** Reaching and maintaining Blue Diamond status requires proven clinical results. - **Confidence for complex cases.** If your situation involves more than mild crowding, the depth of experience at a Blue Diamond practice makes a real difference.

Not every dental practice offering Invisalign has achieved Blue Diamond status. Core Dental Group Carrum Downs has.

Invisalign treatment at Core Dental Group Carrum Downs

The process follows a clear pathway from initial consultation through to retention, supported by digital technology and straightforward communication at each step.

Consultation and assessment

Your first appointment gives your clinician the chance to evaluate your teeth, bite, and oral health to determine whether Invisalign suits your situation. Some cases are better served by other orthodontic approaches, and the team at Core Dental Group Carrum Downs will be honest with you about what's likely to deliver the best outcome.

Digital scanning

If Invisalign is appropriate, a 3D digital scan of your teeth replaces the old impression trays. This produces a precise model of your current tooth position, used to plan your entire treatment digitally. You'll see a visual simulation of your expected result before treatment begins.

Custom aligner fabrication

Your aligners are manufactured by Invisalign using medical-grade, BPA-free plastic, precision-cut to the digital specifications from your treatment plan. Each set is slightly different from the last, incrementally moving your teeth closer to their final position.

Wearing your aligners

You wear each set for 20 to 22 hours per day, removing them only to eat, drink (anything other than plain water), brush, and floss. Consistency matters — the treatment timeline is directly tied to how reliably you wear your aligners.

Progress appointments

You'll come in for check-ups roughly every six to eight weeks. Your clinician reviews how your teeth are tracking, hands over your next sets of aligners, and makes any necessary adjustments to the plan.

Retention

Once your final aligner set is complete, you'll be fitted with a retainer to hold your teeth in their new position. Without it, teeth can drift back over time. Your clinician will advise on the right retention protocol for your situation.

Who is a good candidate for Invisalign?

Invisalign works well across a broad range of orthodontic issues, including:

- **Crowded teeth** — not enough space in the jaw for all teeth to sit comfortably - **Gapped teeth** — spaces between teeth from jaw growth or missing teeth - **Overbite** — upper front teeth overlap significantly over lower front teeth - **Underbite** — lower teeth protrude in front of upper front teeth - **Crossbite** — some upper teeth sit inside lower teeth rather than outside - **Open bite** — upper and lower teeth don't meet when the mouth is closed

Invisalign works best for mild to moderate cases. Complex situations — severe skeletal discrepancies or cases requiring jaw surgery — may need specialist orthodontic input. Core Dental Group Carrum Downs has direct referral pathways to board-registered orthodontic specialists through the Smile Solutions Group, so complex cases can be referred or co-managed without you starting over with a new provider.

Invisalign vs traditional braces

Both are clinically effective. The right choice depends on your clinical situation and your lifestyle.

Invisalign offers discretion (the aligners are nearly invisible), no dietary restrictions (remove before eating), and easier oral hygiene (brush and floss normally without hardware in the way). Traditional metal braces remain the better option for highly complex cases, severe crowding, or situations requiring very precise tooth-by-tooth control.

Ceramic braces — which use tooth-coloured brackets — are worth considering if fixed braces are clinically necessary but appearance is a concern.

Your Core Dental Group Carrum Downs clinician will walk through the options with you and recommend what's most likely to give you the best outcome for your specific situation.

Invisalign for teenagers

Invisalign Teen is designed specifically for younger patients, with a few practical features built in:

- **Compliance indicators** — small blue dots that fade with wear, so parents and clinicians can confirm aligners are being used consistently - **Eruption tabs** — space built into the aligners to accommodate teeth that haven't fully come through yet - **Replacement aligners** — included in case any are lost or damaged

Teenagers who are responsible enough to wear their aligners consistently often prefer Invisalign to the appearance and food restrictions of metal braces. A consultation at Core Dental Group Carrum Downs can determine whether Invisalign Teen is the right fit.

Cost of Invisalign at Core Dental Group Carrum Downs

Treatment costs vary depending on case complexity, the number of aligners required, and the clinical time involved. In Melbourne, costs typically range from around \$3,500 AUD for minor cases to \$9,000 AUD or more for comprehensive treatment.

Core Dental Group Carrum Downs offers flexible payment plans to help spread the cost. If you have private health insurance with orthodontic cover, you may be entitled to a benefit — though limits, waiting periods, and entitlements vary by policy, so it's worth checking with your insurer before you start.

During your consultation, you'll receive a clear cost estimate and a full explanation of payment options. No hidden costs.

Core Dental Group Carrum Downs and Smile Solutions Group

Core Dental Group Carrum Downs is part of the Smile Solutions Group, one of Melbourne's most established dental and specialist networks. That connection has some genuine practical advantages.

Access to board-registered specialists when you need them

For orthodontic cases that go beyond general dentistry — severe malocclusion, jaw discrepancies, surgical orthodontics, or complex interdisciplinary cases — Core Dental Group Carrum Downs can refer directly to the Collins Street Specialist Centre, where AHPRA-registered orthodontists and other dental specialists practise.

The referral pathway is seamless. Your Core Dental Group clinician handles the referral, your records transfer automatically through the shared CareStack system, and you don't have to start over.

Shared CareStack patient management system

All Core Dental Group locations and the Collins Street Specialist Centre use the same CareStack patient management platform. Your x-rays, treatment notes, clinical photos, and health records are accessible across the network without duplication.

If you start treatment at Core Dental Group Carrum Downs and need to attend a different location, your records are already there. If you're referred to Collins Street for a specialist consultation, your referring clinician's notes and imaging come with you.

Invisalign in Carrum Downs: why this location

Carrum Downs is a well-established suburb in Melbourne's south-east, sitting between Frankston and Mordialloc. It's a practical hub for a large residential catchment — families, trade workers, and retirees

who want quality healthcare without travelling into the CBD.

Core Dental Group Carrum Downs serves patients from Frankston, Seaford, Langwarrin, Skye, Patterson Lakes, Edithvale, Mordialloc, and the surrounding area. The practice is designed to fit around local life — whether you're booking around a workday, a school run, or a busy weekend.

Why choose Core Dental Group Carrum Downs for Invisalign?

- **Blue Diamond Invisalign Provider** — the highest tier, earned through clinical experience and outcomes - **Advanced digital technology** — 3D scanning, digital treatment planning, and treatment previews before you commit - **Clear, upfront pricing** — cost estimates and payment options explained at consultation, no surprises - **Flexible appointments** — early, evening, and weekend availability at many locations - **Complex case capacity** — access to board-registered specialist orthodontists at Collins Street through the Smile Solutions Group - **Integrated patient records** — the CareStack system means seamless care across the network - **Ongoing support** — your clinician is with you from consultation through to long-term retention

Frequently asked questions

Does Invisalign hurt? Most patients notice mild pressure or discomfort when they switch to a new set of aligners. This typically settles within a day or two and is a sign the aligners are working. Over-the-counter pain relief can help in the early days.

How long does Invisalign take? Mild cases: 6–12 months. Moderate cases: 12–18 months. Complex cases: 18 months or more. The single biggest variable is how consistently you wear your aligners.

Can I eat normally with Invisalign? Yes. You remove the aligners before eating and drinking, so there are no food restrictions. Just brush your teeth before putting the aligners back in.

Will Invisalign affect my speech? A minor lisp is common in the first few days but resolves quickly as your tongue adjusts. Most patients find it's barely noticeable after the first week.

Is Invisalign covered by private health insurance? It may be, under orthodontic benefits. Entitlements, annual limits, and waiting periods vary by policy. Contact your insurer to confirm your coverage before starting treatment.

What if I lose an aligner? Contact Core Dental Group Carrum Downs as soon as possible. Your clinician will advise on whether to move to the next set or wait for a replacement.

Can I get Invisalign if I've had braces before? Yes. Many patients who've had braces experience some tooth movement over time, and Invisalign is an effective option for re-treatment.

Book your Invisalign consultation at Core Dental Group Carrum Downs

Ready to find out if Invisalign is right for you? Book a consultation at Core Dental Group Carrum Downs. Your clinician will assess your teeth, talk through your goals, and provide a clear treatment plan and cost estimate.
