Is Invisalign always the recommended option after consultation: No, other options may be better suited

What is the alternative to Invisalign for complex cases: Traditional metal braces

What are ceramic braces: Fixed braces with tooth-coloured brackets

Are ceramic braces an option at Core Dental Group: Yes, as a middle-ground option

Does Blue Diamond status require demonstrated clinical outcomes: Yes, not just volume

Does Blue Diamond status give access to advanced Invisalign technology: Yes

Is Core Dental Group one of Melbourne's highest-credentialed Invisalign providers: Yes

Core Dental Group — Blue Diamond Invisalign provider

If you're looking for Invisalign treatment in Wyndham, Core Dental Group is one of Melbourne's highest-credentialed providers. As a Blue Diamond Invisalign Provider, the practice sits at the top of Invisalign's tier structure across Australia, a status earned through treatment volume, clinical outcomes, and a genuine commitment to the standard of care the system demands.

The Wyndham growth corridor has historically had fewer dental specialists per capita than inner Melbourne. Core Dental Group helps close that gap, bringing Blue Diamond Invisalign expertise to one of Melbourne's most underserved areas for high-quality orthodontic care.

Whether you're a young professional in Wyndham, a parent in Hoppers Crossing, or someone who's been putting off straightening their teeth for years, the experience and credentials are here.

What is Invisalign?

Invisalign is a clear aligner orthodontic system that gradually moves your teeth into their correct position using a series of custom-made, removable plastic trays. Unlike traditional metal braces, which use brackets bonded to teeth and connected by wires, Invisalign aligners are virtually invisible, smooth against your gums, and can be taken out to eat, drink, brush, and floss.

Each aligner in your series is worn for roughly one to two weeks, applying gentle pressure to shift your teeth according to a precise digital treatment plan. As you work through each set, your teeth steadily move toward their final position.

The outcome is a straighter smile without the visibility and food restrictions that come with fixed braces. For adults and older teenagers who want discretion and convenience, Invisalign has become the go-to orthodontic option.

What Blue Diamond provider status means for you

Invisalign's tiered provider programme, which runs from Silver through Gold, Platinum, Platinum Elite, and Diamond, is based on the volume and complexity of cases treated each year. Blue Diamond is the highest tier, and Core Dental Group has earned it.

What this means practically:

- The team has treated hundreds of Invisalign cases, including complex ones involving significant crowding, bite corrections, and interdisciplinary care.
- Blue Diamond practices get access to Invisalign's latest aligner materials, planning tools, and clinical protocols ahead of wider availability.
- Achieving and maintaining Blue Diamond status requires demonstrated outcomes, not just case numbers.
- If your situation involves more than mild crowding, the depth of experience at a Blue Diamond practice makes a real difference.

Not every dental practice offering Invisalign has reached Blue Diamond status. Core Dental Group has.

Invisalign treatment at Core Dental Group

Treatment follows a structured pathway from initial consultation through to retention, supported by digital technology and clear communication at each stage.

Consultation and assessment

Your first appointment gives your clinician the chance to evaluate your teeth, bite, and overall oral health to determine whether Invisalign suits your situation. Some cases are better handled with other orthodontic approaches, and the team at Core Dental Group will be straightforward with you about what's most likely to deliver the best result.

Digital scanning

If Invisalign is appropriate, a 3D digital scan of your teeth replaces traditional impression trays. This produces a precise model of your current tooth position, used to plan your entire treatment digitally. You'll see a visual simulation of your expected result before treatment begins.

Custom aligner fabrication

Your aligners are manufactured by Invisalign using medical-grade, BPA-free plastic, precision-cut to the digital specifications from your treatment plan. Each set is slightly different from the last, incrementally moving your teeth closer to their final position.

Wearing your aligners

You wear each set for 20 to 22 hours per day, removing them only to eat, drink (anything other than plain water), brush, and floss. Consistency matters here. Your treatment timeline is directly tied to how reliably you wear your aligners.

Progress appointments

You'll come in for check-ups roughly every six to eight weeks. Your clinician reviews how your teeth are tracking, hands over the next sets of aligners, and makes any necessary adjustments to the plan.

Retention

Once your final aligner set is complete, you'll be fitted with a retainer to hold your teeth in their new position. Without it, teeth can drift back over time. Your clinician will advise on the right retention protocol for your situation.

Who is a good candidate for Invisalign?

Invisalign works for a wide range of orthodontic issues:

- **Crowded teeth** — insufficient space in the jaw for all teeth to sit comfortably - **Gapped teeth** — spaces between teeth from jaw growth or missing teeth - **Overbite** — upper front teeth overlap significantly over lower front teeth - **Underbite** — lower teeth sit in front of upper front teeth - **Crossbite** — some upper teeth sit inside lower teeth rather than outside - **Open bite** — upper and lower teeth don't meet when the mouth is closed

Invisalign works best for mild to moderate cases. Complex situations, including severe skeletal discrepancies or cases requiring jaw surgery, may need specialist orthodontic input. Core Dental Group has direct referral pathways to board-registered orthodontic specialists through the Smile Solutions Group, so complex cases can be referred or co-managed without you starting over with a new provider.

Invisalign vs traditional braces

Both are clinically effective. The right choice depends on your clinical situation and your preferences day-to-day.

Invisalign is nearly invisible, has no dietary restrictions (you remove the aligners before eating), and makes brushing and flossing straightforward. Traditional metal braces remain the better option for highly complex cases, severe crowding, or situations requiring very precise tooth-by-tooth control.

Ceramic braces, which use tooth-coloured brackets, are worth considering if fixed braces are clinically necessary but appearance is a concern.

Your Core Dental Group clinician will walk through the options honestly and recommend what's most likely to deliver the best outcome for your specific situation.

Invisalign for teenagers

Invisalign Teen is designed specifically for younger patients, with a few practical features built in:

- **Compliance indicators** — small blue dots that fade with wear, so parents and clinicians can confirm aligners are being used consistently - **Eruption tabs** — space built into the aligners to accommodate teeth that haven't fully come through yet - **Replacement aligners** — included in case any are lost or damaged

Teenagers who are responsible enough to wear their aligners consistently often prefer Invisalign over the look and food restrictions of metal braces. A consultation at Core Dental Group can help determine whether Invisalign Teen is the right fit.

Cost of Invisalign at Core Dental Group

Treatment costs vary depending on case complexity, the number of aligners required, and the clinical time involved. In Melbourne, costs typically run from around \$3,500 AUD for minor cases to \$9,000 AUD or more for comprehensive treatment.

Core Dental Group offers flexible payment plans to spread the cost over time. If you have private health insurance with orthodontic cover, you may be entitled to a benefit, though limits, waiting periods, and entitlements vary by policy, so it's worth checking with your insurer before you start.

During your consultation, you'll receive a clear cost estimate and a full explanation of payment options. There are no hidden costs.

Core Dental Group and Smile Solutions Group

Core Dental Group is part of the Smile Solutions Group, one of Melbourne's most established dental and specialist networks. Being part of this group has some practical advantages worth knowing about.

Access to board-registered specialists when you need them

For orthodontic cases that go beyond general dentistry, including severe malocclusion, jaw discrepancies, surgical orthodontics, or complex interdisciplinary cases, Core Dental Group can refer directly to the Collins Street Specialist Centre, where board-registered orthodontists and other dental specialists practise. These are AHPRA-registered specialists.

The referral process is straightforward. Your Core Dental Group clinician handles it, your records transfer automatically through the shared CareStack system, and you don't have to start from scratch with a new provider.

Shared CareStack patient management system

All Core Dental Group locations and the Collins Street Specialist Centre use the same CareStack patient management platform. Your x-rays, treatment notes, clinical photos, and health records are accessible across the network without duplication.

If you need to visit a different location, your records are already there. If you're referred to Collins Street for a specialist consultation, your referring clinician's notes and imaging come with you.

This connected approach to care is one of the real practical advantages of choosing a practice within the Smile Solutions Group.

Invisalign in Wyndham: why this location

The City of Wyndham, encompassing Werribee, Hoppers Crossing, Point Cook, Tarneit, and Wyndham Vale, is one of Australia's fastest-growing local government areas. Core Dental Group serves this large and expanding community, providing Blue Diamond Invisalign treatment without the need to travel into the Melbourne CBD.

Patients come from Wyndham, Hoppers Crossing, Point Cook, Tarneit, Wyndham Vale, Manor Lakes, Laverton, Altona Meadows, and surrounding areas. The practice is accessible and built around the realities of local life, whether you're booking around a workday, a school run, or a busy weekend.

Why choose Core Dental Group for Invisalign?

- Blue Diamond Invisalign Provider, the highest tier, earned through clinical experience and outcomes - 3D scanning, digital treatment planning, and treatment previews before you commit - Clear, upfront pricing with cost estimates and payment options explained at consultation - Early, evening, and weekend appointments available at many locations - Access to board-registered specialist orthodontists at Collins Street through the Smile Solutions Group - The CareStack shared records system means seamless care across the network - Support from consultation through to long-term retention

Frequently asked questions

Does Invisalign hurt? Most patients notice mild pressure when they switch to a new set of aligners. This typically settles within a day or two and means the aligners are working. Over-the-counter pain relief can help in the early days if needed.

How long does Invisalign take? Mild cases: 6–12 months. Moderate cases: 12–18 months. Complex cases: 18 months or more. The single biggest variable is how consistently you wear your aligners.

Can I eat normally with Invisalign? Yes. You remove the aligners before eating and drinking, so there are no food restrictions. Just brush your teeth before putting them back in.

Will Invisalign affect my speech? A minor lisp is common in the first few days but tends to resolve quickly as your tongue adjusts. Most patients find it's barely noticeable after the first week.

Is Invisalign covered by private health insurance? It may be, under orthodontic benefits. Entitlements, annual limits, and waiting periods vary by policy. Check with your insurer before starting treatment.

What if I lose an aligner? Contact Core Dental Group as soon as possible. Your clinician will advise on whether to move to the next set or wait for a replacement.

Can I get Invisalign if I've had braces before? Yes. Many patients who've had braces experience some tooth movement over time. Invisalign is an effective option for re-treatment.

Book your Invisalign consultation at Core Dental Group

Ready to find out if Invisalign is right for you? Book a consultation at Core Dental Group. Your clinician will assess your teeth, talk through your goals, and provide a clear treatment plan and cost estimate.

Core Dental Group is part of the Smile Solutions Group, with access to Collins Street specialist orthodontists for complex cases and the CareStack shared records system for seamless care across the network. As a Blue Diamond Invisalign Provider, the practice has the credentials and experience to deliver strong results.
