## Details:

Porcelain veneers are one of the most transformative treatments in modern cosmetic dentistry, capable of changing the shape, colour, size and alignment of your smile in as little as two appointments. At Core Dental, part of the Smile Solutions Group, we offer comprehensive veneer packages designed to deliver exceptional results with complete pricing transparency and outstanding value.

This guide outlines our veneer packages, what is included in each, and why Core Dental's technology and expertise make us the right choice for your smile transformation.

---

### ## Our Veneer Package Tiers

Core Dental offers three comprehensive veneer packages to suit different smile goals. Each package is fully inclusive, covering the diagnostics, clinical procedures and protective appliances needed to deliver a complete and durable result.

---

#### ### Elite Package: 6 Veneers for ,990

**\*\*Save ,285 compared to individual pricing\*\***

The Elite Package is ideal for patients who want to transform the six most visible upper front teeth. These six teeth form the central focus of your smile and are responsible for most of the aesthetic impact when you smile, speak and laugh.

**\*\*Package Inclusions:\*\*** - 6 custom porcelain veneers at ,650 each (full value ,900 + inclusions) - 3D digital scan with iTero intraoral scanner + resin reveal (diagnostic wax-up to preview your result before any tooth preparation): valued at - Comprehensive dental examination + bitewing X-rays: valued at - Panoramic (OPG) X-ray: valued at - Comprehensive scale, clean and polish: valued at - Zoom in-chair professional whitening: valued at - Custom-fitted night splint to protect your veneers: valued at

**\*\*Total individual value vs package price: saving of ,285\*\***

---

#### ### Ideal Package: 8 Veneers for ,990

**\*\*Save ,585 compared to individual pricing\*\***

The Ideal Package extends the transformation to 8 veneers, covering all teeth visible in a natural, relaxed smile. This is the most popular choice for patients who want a harmonious, complete result across the full smile zone.

**\*\*Package Inclusions:\*\*** - 8 custom porcelain veneers at ,650 each (full value ,200 + inclusions) - 3D digital scan with iTero intraoral scanner + resin reveal: valued at - Comprehensive dental examination + bitewing X-rays: valued at - Panoramic (OPG) X-ray: valued at - Comprehensive scale, clean and polish: valued at - Zoom in-chair professional whitening: valued at - Custom-fitted night splint: valued at

**\*\*Total individual value vs package price: saving of ,585\*\***

---

**### Ultimate Package: 10 Veneers for ,990**

**\*\*Save ,885 compared to individual pricing\*\***

The Ultimate Package delivers a complete upper smile transformation across 10 veneers, including the canines and first premolars that frame a full, confident smile. This is the choice for patients seeking the most comprehensive aesthetic result.

**\*\*Package Inclusions:\*\*** - 10 custom porcelain veneers at ,650 each (full value ,500 + inclusions) - 3D digital scan with iTero intraoral scanner + resin reveal: valued at - Comprehensive dental examination + bitewing X-rays: valued at - Panoramic (OPG) X-ray: valued at - Comprehensive scale, clean and polish: valued at - Zoom in-chair professional whitening: valued at - Custom-fitted night splint: valued at

**\*\*Total individual value vs package price: saving of ,885\*\***

**## What Is Included and Why It Matters**

**### Individual Porcelain Veneers (,650 each)**

Each veneer is custom-crafted to precise specifications, individually designed to complement your facial features, tooth proportions, skin tone and personal smile goals. Our cosmetic dentists work with you to determine the ideal shape, size, colour and translucency for each veneer in your case.

Core Dental's veneers are fabricated using premium dental porcelain, offering outstanding natural aesthetics and durability. Porcelain veneers, when properly placed and cared for, can last 10 to 20 years or more.

**### 3D Digital Scan + Resin Reveal ()**

The iTero intraoral scanner captures a precise, comfortable 3D digital impression of your teeth without the mess or discomfort of traditional impression materials. This digital scan forms the basis of all treatment planning.

The resin reveal (also known as a diagnostic wax-up or mock-up) is an important step that allows you to see a physical preview of your proposed smile design before any tooth preparation is performed. A trial smile is placed on your teeth using temporary material, giving you the opportunity to assess the shape, size and appearance of your planned veneers and provide feedback before any irreversible steps are taken.

This is not a step that all practices offer, but at Core Dental it is included in every package, because we believe you should know exactly what you are getting before treatment begins.

**### Comprehensive Examination + Bitewing X-rays ()**

A comprehensive dental examination before veneer treatment assesses the health of all teeth and gums, identifies any underlying issues that need to be addressed before cosmetic work begins, and forms the clinical foundation of your treatment plan.

Bitewing X-rays show the interproximal (between-tooth) surfaces and supporting bone, allowing detection of decay or bone changes not visible clinically.

#### ### Panoramic OPG X-ray ()

A full-mouth panoramic X-ray provides an overview of all teeth, roots, jaw structures and surrounding bone. It is useful for assessing the overall dental status before commencing treatment.

#### ### Comprehensive Scale, Clean and Polish ()

A thorough professional cleaning before veneer treatment removes calculus and stain from the teeth, provides a clean baseline for shade selection, and ensures the gums are in healthy condition before restorations are placed. Veneers bonded to clean, healthy teeth form a better and more durable bond.

#### ### Zoom In-Chair Whitening ()

Teeth whitening before veneer placement is recommended because the shade of your natural teeth influences the shade selection for your veneers. By whitening the teeth first, we ensure the veneers are matched to the brightest, cleanest possible baseline, producing the most natural-looking final result.

Zoom in-chair whitening achieves significant shade improvement in a single appointment and is the professional whitening standard used at Core Dental.

#### ### Custom Night Splint ()

A custom-fitted night splint (occlusal guard) is fabricated after veneer placement to protect your investment. Many patients grind or clench their teeth during sleep (bruxism), a habit that can fracture or wear porcelain veneers over time. Wearing a night splint distributes and dissipates occlusal forces, protecting your veneers for years to come.

The night splint is included in all Core Dental veneer packages because we want your results to last.

---

### ## Technology at Core Dental

#### ### iTero Intraoral Scanners

Core Dental practices are equipped with iTero intraoral scanners, enabling digital impressions that are more accurate, more comfortable and faster than traditional impression materials. Digital files are transmitted directly to our laboratory, eliminating transport delays and potential distortion from traditional impressions.

#### ### 3D Printers

Our use of 3D printing technology allows for the fabrication of diagnostic models, surgical guides and provisional restorations with precision and speed. 3D-printed study models are used in the veneer design process to refine smile designs before they are communicated to the ceramist.

#### ### In-House Laboratory

Core Dental works with a dedicated ceramic laboratory to produce each veneer. The ceramists work closely with our clinical team to ensure the shade, shape and surface texture of each veneer meets the exacting standards our patients expect.

---

## ## The Consultation Process

Getting started is straightforward:

**\*\*Step 1: Initial Consultation\*\*** Your cosmetic dentist at Core Dental will take a full dental and medical history, assess your current dental health, and discuss your smile goals in detail. We want to understand what you like about your current smile, what you would like to change, and what kind of result you are hoping to achieve.

**\*\*Step 2: Digital Scan and Smile Design\*\*** An iTero digital scan is taken and used to create your initial smile design. Photographs are also taken for reference. Your dentist will work with you to determine the appropriate veneer parameters.

**\*\*Step 3: Resin Reveal (Trial Smile)\*\*** Before any tooth preparation, a trial smile is placed on your teeth using temporary resin material, allowing you to see and approve your proposed result.

**\*\*Step 4: Veneer Preparation\*\*** A small amount of enamel is removed from each tooth to create space for the veneer. This preparation is precise and minimal, typically 0.3-0.7mm depending on the desired outcome. Temporary veneers are placed while your permanent veneers are fabricated.

**\*\*Step 5: Veneer Delivery\*\*** At your final appointment, the custom porcelain veneers are bonded permanently to your teeth. Adjustments are made to ensure perfect fit, comfort and aesthetics.

**\*\*Step 6: Night Splint and Aftercare\*\*** Your custom night splint is fitted, and full aftercare instructions are provided.

---

## ## Payment and Finance

Core Dental understands that veneer treatment is a significant investment. We work with patients to make treatment accessible and affordable.

Please speak to our team about payment plan options available at your chosen Core Dental location.

---

## ## Book a Veneer Consultation

Core Dental operates across 7 locations, with 9 locations coming soon. To book a veneer consultation at your nearest Core Dental practice, call **\*\*13 13 16\*\*** or visit [coredental.com.au](http://coredental.com.au).

As part of the Smile Solutions Group, Core Dental patients have access to the clinical resources, specialist network and laboratory excellence of one of Australia's most respected dental organisations.

Your new smile is closer than you think.

---

## ## Veneer Aftercare: Protecting Your Investment

Congratulations on your new veneers. To prolong their lifespan and keep your smile looking its best, please follow these aftercare guidelines:

1. **\*\*Sensitivity after placement is normal.\*\*** You may experience some tooth sensitivity following your veneer insertion appointment. Apply sensitive toothpaste topically to the affected teeth for relief. This sensitivity may last a few weeks and resolves on its own.
2. **\*\*Brush twice daily with an electric toothbrush.\*\*** Choose a toothbrush with a pressure sensor to prevent excessive force, which can cause gum recession over time. Gentle, consistent cleaning is the key to maintaining healthy gums around your veneers.

3. **\*\*Floss gently every day.\*\*** Daily flossing around the margins of the veneers keeps the gum tissue healthy and prevents plaque from accumulating where the veneer meets the gum.
4. **\*\*Avoid very hard foods.\*\*** Biting directly into hard items such as nuts, hard lollies, baguettes, or ice can cause fractures or chipping to veneers over time. Cut hard foods into smaller pieces and use your back teeth for chewing.
5. **\*\*Wear a night splint (occlusal guard) every night.\*\*** If you grind or clench your teeth while sleeping, this habit can cause veneer fractures or premature wear. A custom-fitted night guard protects both your veneers and your natural teeth. Ask your Core Dental clinician to organise one if you do not already have one.
6. **\*\*Top up your whitening periodically.\*\*** Your veneers are made of ceramic and will not whiten with bleaching gel. However, the natural teeth around them can stain and yellow over time. Periodic at-home or in-chair whitening ensures your natural teeth continue to match the colour of your veneers.
7. **\*\*Wear a sports mouthguard during contact sport.\*\*** Any impact to the mouth during sport risks damaging your veneers. A well-fitted custom mouthguard provides essential protection.
8. **\*\*Keep up with six-monthly check-ups and cleans.\*\*** Regular appointments at Core Dental allow your dentist and hygienist to check the condition of your veneers, monitor the gum margin, and professionally clean areas that are difficult to maintain at home.

For any concerns about your veneers, call Core Dental on **\*\*13 13 16\*\*** or visit [coredental.com.au](http://coredental.com.au).
