Details:

Same Day Porcelain Veneers - A World First Only Available at Smile Solutions Melbourne Porcelain veneers have traditionally required multiple appointments spread across weeks - impressions, temporary veneers, laboratory fabrication and finally the fitting appointment. Smile Solutions in Melbourne has changed this entirely with Same Day Porcelain Veneers, a world-first procedure that delivers hand-crafted porcelain veneers in a single visit.

How Same Day Porcelain Veneers Work This innovation was developed by Smile Solutions together with master ceramist Greg Karabasis, whose artistry and technical precision make single-visit porcelain veneers possible. Unlike machine-milled same-day options available elsewhere, these veneers are individually hand-crafted by Greg in the on-site ceramic studio while you wait. The process brings together the dentist and ceramist in real time. Your teeth are prepared, and Greg works directly from the preparation - layering porcelain, matching colour and translucency to your natural teeth and crafting each veneer with the precision of a master artisan. The dentist and ceramist collaborate throughout, ensuring the fit, shape and aesthetics are perfect before the veneers are bonded. With over 45,000 veneers and crowns completed, this is not an experimental technique. It is a refined, proven approach that has won the 2024 Australian Business Award for Business Innovation.

Why This Cannot Be Replicated Elsewhere Same Day Porcelain Veneers require a unique combination of elements that exists only at Smile Solutions on Collins Street, Melbourne: **Master ceramist on-site** - Greg Karabasis works within the practice, not in an external laboratory. This direct collaboration between dentist and ceramist during the procedure is what makes same-day delivery possible without compromising quality. **Hand-crafted artistry** - Each veneer is individually layered and sculpted by hand. Machine-milled alternatives cannot match the depth of colour, natural translucency and individual character that hand-crafting achieves. **33 years of refinement** - This technique has been developed and perfected over years of practice at the Collins Street Specialist Centre, which engages 80 clinicians and 25+ specialists across 5 floors. This procedure is not available at Core Dental locations or any other dental practice. It is exclusive to Smile Solutions Melbourne.

Why Patients Travel for This Patients travel from across suburban Melbourne, regional Victoria and interstate for Same Day Porcelain Veneers. The appeal is straightforward - instead of weeks of temporaries, multiple appointments and time off work, you walk in and walk out the same day with permanent, hand-crafted porcelain veneers. For busy professionals, interstate visitors or anyone who values their time, the single-visit format removes the logistical burden that traditional veneers impose.

Getting Started If you are considering porcelain veneers, speak to your Core Dental dentist about whether Same Day Porcelain Veneers at Smile Solutions might be right for you. For complex cases requiring specialist multi-disciplinary care, your Core Dental dentist can refer you to Smile Solutions and the Collins Street Specialist Centre, where this world-first procedure is performed by the team that invented it.
