Why Choose a Smile Solutions Group Practice

When you choose Core Dental, you are choosing more than a local dentist. You are choosing a practice backed by the full resources, expertise, and specialist depth of the Smile Solutions Group - Australia's largest single-location private dental group, trusted by over 300,000 patients since 1993.

Here is what that means for you.

Specialist Support When You Need It

Most suburban dental practices operate independently. When you need specialist care - an oral surgeon for a difficult extraction, an orthodontist for complex alignment, or a prosthodontist for implant planning - you are typically referred outside the practice and left to navigate the process yourself.

At Core Dental, it works differently. Our clinicians have direct access to the Collins Street Specialist Centre (CSSC) on Level 8 of the Manchester Unity Building, where the Smile Solutions Group brings together specialists in: **Orthodontics** - Including complex cases and multidisciplinary alignment **Oral and maxillofacial surgery** - Wisdom teeth, implant placement, and surgical procedures **Endodontics** - Advanced root canal treatment and retreatment **Periodontics** - Gum disease treatment and surgical management **Prosthodontics** - Complex restorations, full-mouth rehabilitation, and implant prosthetics **Paediatric dentistry** - Specialist care for children with complex needs

Your referral is handled within the group. Your records are shared securely. Your local Core Dental clinician stays involved in your care throughout. It is specialist dentistry without the fragmentation.

Blue Diamond Invisalign Provider

Invisalign's provider tiers are based on treatment volume - the more cases a practice completes, the higher the tier and the deeper the expertise. The Smile Solutions Group holds **Blue Diamond status**, the highest tier available, achieved through the combined volume of Smile Solutions and Core Dental together.

What does this mean for Core Dental patients? It means your Invisalign treatment is supported by a group that has completed thousands of cases. Our clinicians have access to advanced techniques, difficult case protocols, and peer support that smaller practices simply do not have.

Three Decades of Clinical Excellence

The Smile Solutions Group was founded in 1993 by Dr Kia Pajouhesh with a simple vision: bring together the best clinicians, the latest technology, and genuine care for patients. That vision has grown from a single practice to a network of locations across Melbourne, but the founding principles remain

unchanged.

Every Core Dental practice operates under the same clinical standards, infection control protocols, and quality framework as the Collins Street flagship. Our clinicians are supported with ongoing professional development, peer collaboration, and access to the latest dental technology.

The Numbers Speak **300,000+** patients treated across the group **80+** clinicians including general dentists, hygienists, and therapists **25+** registered specialists across multiple disciplines **30+ years** of continuous operation since 1993 **Multiple award winner** - Including Australian Business Awards for Service Excellence and Business Innovation

Local Care, Group Strength

Choosing a Smile Solutions Group practice means you get the personal attention and convenience of a local dental home, with the clinical depth and specialist backing of Melbourne's most comprehensive dental group behind you.
